Image Mapping Using TMG Utility

Presented by
David A. Walker

to the Roots Users Group
Arlington, Virginia

Date: 14 December 2013

Introduction

This presentation is a revised edition of one I gave to the Ottawa TMG Users Group (Ontario, Canada) in the recent past.

Today's presentation will incorporate TMG Utility ver. 7.3 Build 1 & Second Site ver. 5.0 Build 9 by John Cardinal, and TMG ver. 8.08 by Wholly Genes. These are the current versions of each of the three applications as of this writing.

Introduction

Edit Exhibit Image Map is a tool in TMG Utility for creating HTML image maps that will be used with Second Site. Image maps are useful in creating multiple clickable regions within a single exhibit.

Introduction

Edit Exhibit Image Map is a tool in TMG Utility for creating HTML image maps that will be used with Second Site. Image maps are useful in creating multiple clickable regions within a single exhibit.

It is intended to be used with **external exhibits**, but can also be used to edit any image format that is recognized by TMG.

Introduction

How would an image map appear on a Second Site page?

Imagine having a family portrait where you could click on any face and display the page for that person.

Introduction

Group Photo*

He is included in a group photograph, circa 1893 in **Kensington, Prince County, Prince Edward Island, Canada**. Photo courtesy of Lois Andrews. If you are viewing this photo from a web publication, you may click on any of the faces to view that person's page.[8]

Family portrait of David & Elizabeth (Higgins) Walker, ca. 1893. Back row: "Ewen" MacGregor, "James" Colin, Catherine "Minnie", "Ira" David. Front row: "Laura" Scott, David, Mary Elizabeth "Lizzie", "William" Higgins, Elizabeth (Higgins). Click on any face to view that person's page.

Introduction

A click on each face will display that person's page

Ira David Walker[1]
M, b. 21 July 1878, d. 28 December 1922

"Ira" David Walker (1878-1922)

Elizabeth Higgins[1,2]
F, b. 14 March 1846, d. 18 November 1934

Elizabeth (Higgins) Walker (1846-1934)

Introduction

- From conversations with John Cardinal I will share the following definitions, which will help in your experience with creating image maps.

Introduction

- From conversations with John Cardinal I will share the following definitions, which will help in your experience with creating image maps.

- John, what's the difference between an image and an exhibit?

Introduction

- From conversations with John Cardinal I will share the following definitions, which will help in your experience with creating image maps.

- John, what's the difference between an image and an exhibit?
  - "An **image** is a digital graphic such as a scanned photograph or document.

Introduction

- From conversations with John Cardinal I will share the following definitions, which will help in your experience with creating image maps.

- John, what's the difference between an image and an exhibit?
  - "An **image** is a digital graphic such as a scanned photograph or document.
  - An **exhibit** is a TMG data item that associates an image with a person, event, name, place, source or citation as recorded in the TMG database."

Introduction

- “Let's say you have scanned a photograph of someone. At that point, you have a digital image. When you decide to add the image to a person's record in your TMG project, you add an exhibit and along the way you tell TMG the path to the image file. Now you have both the original image and you have a separate, but related, exhibit. The image is not the exhibit, and the exhibit is not the image. The image is referenced by the exhibit.”

Introduction

- “TMGU will store the image map in the exhibit record if you start the process with the [Edit Exhibit Image Map] button, and then select an exhibit.”

Introduction

- "TMGU will store the image map in the exhibit record if you start the process with the [Edit Exhibit Image Map] button, and then select an exhibit."

- "If you start with the [Edit Image Map] button, TMGU will NOT change an exhibit record because you haven't picked one, you've chosen an image file instead."

Introduction

- "TMGU will store the image map in the exhibit record if you start the process with the [Edit Exhibit Image Map] button, and then select an exhibit."

- "If you start with the [Edit Image Map] button, TMGU will NOT change an exhibit record because you haven't picked one, you've chosen an image file instead."

- Thank you, John. **Sage advice**: Remember the contents of these previous three slides for when you begin the mapping process in TMGU.

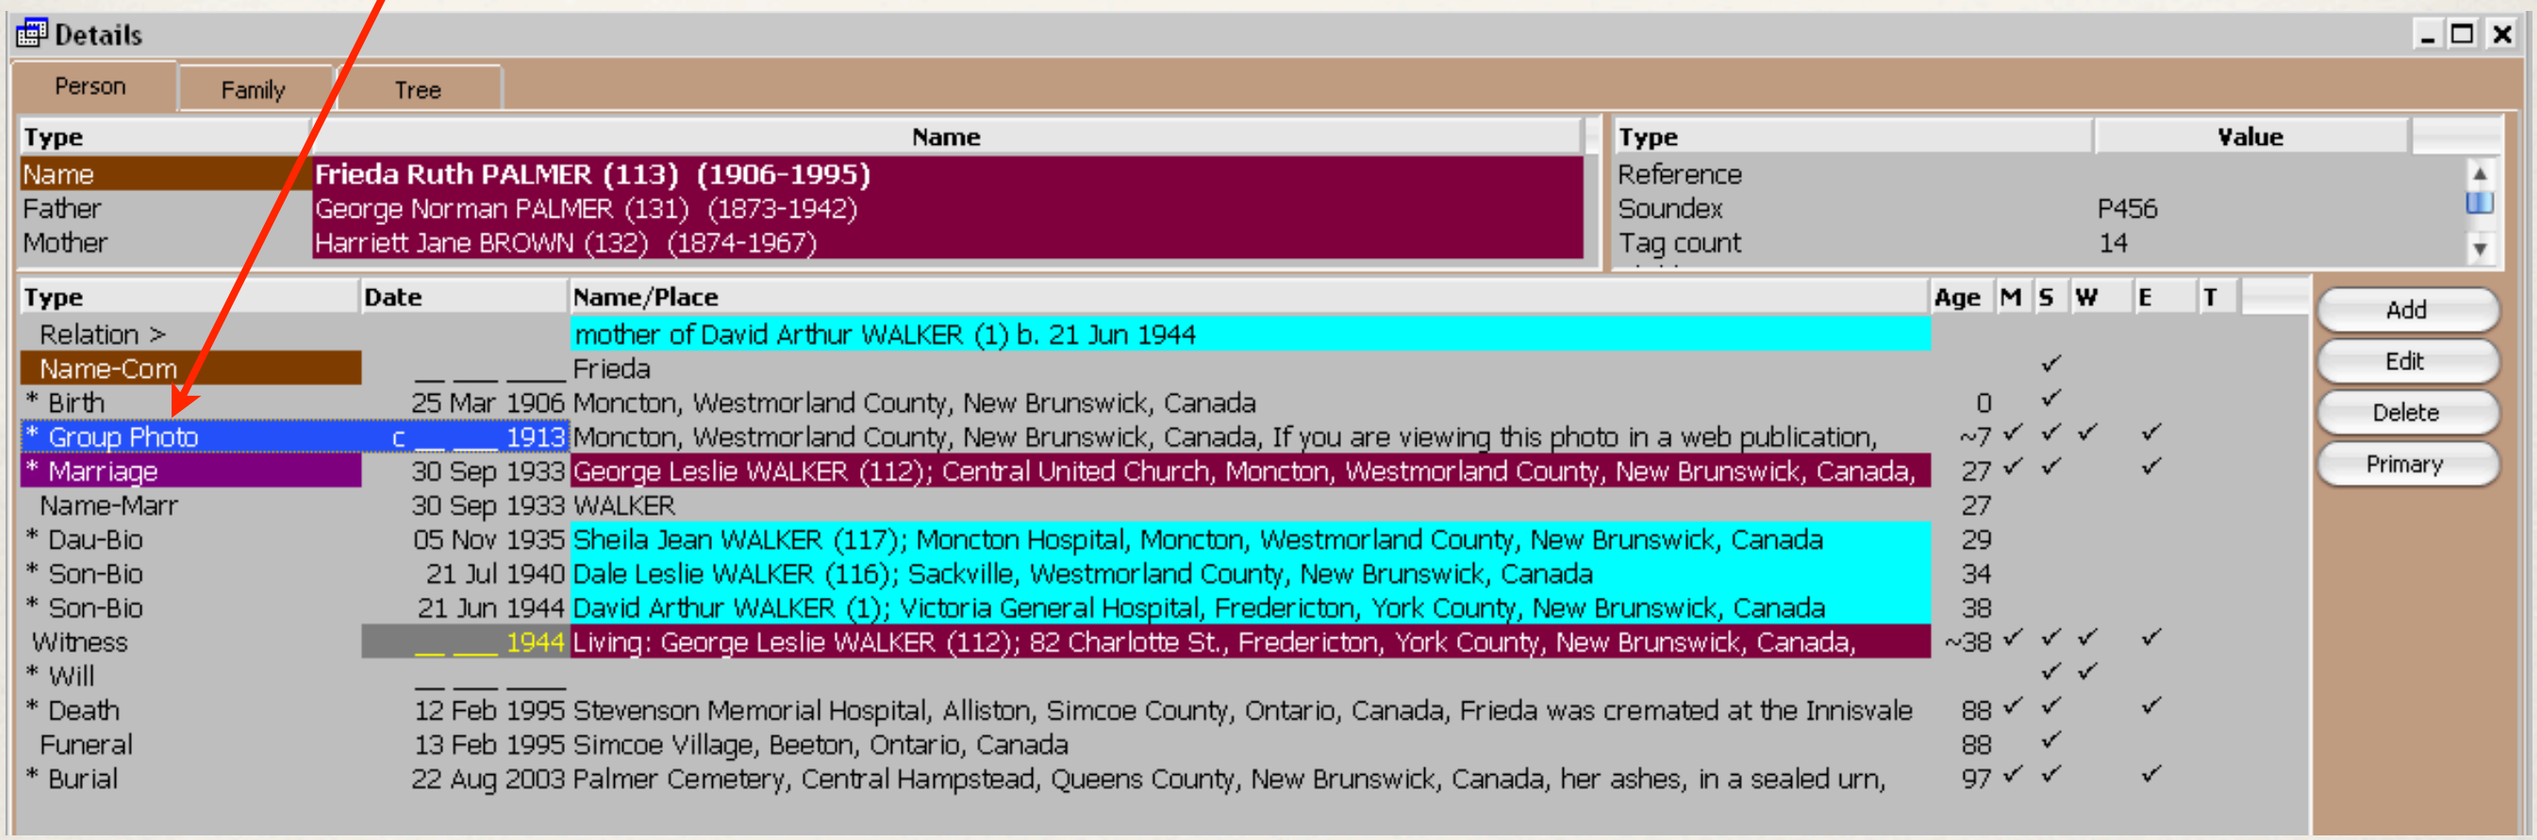
26. Click **OK**

Step 1: TMG Exhibits

Tag Entry

27. New **Tag** appears in Details window

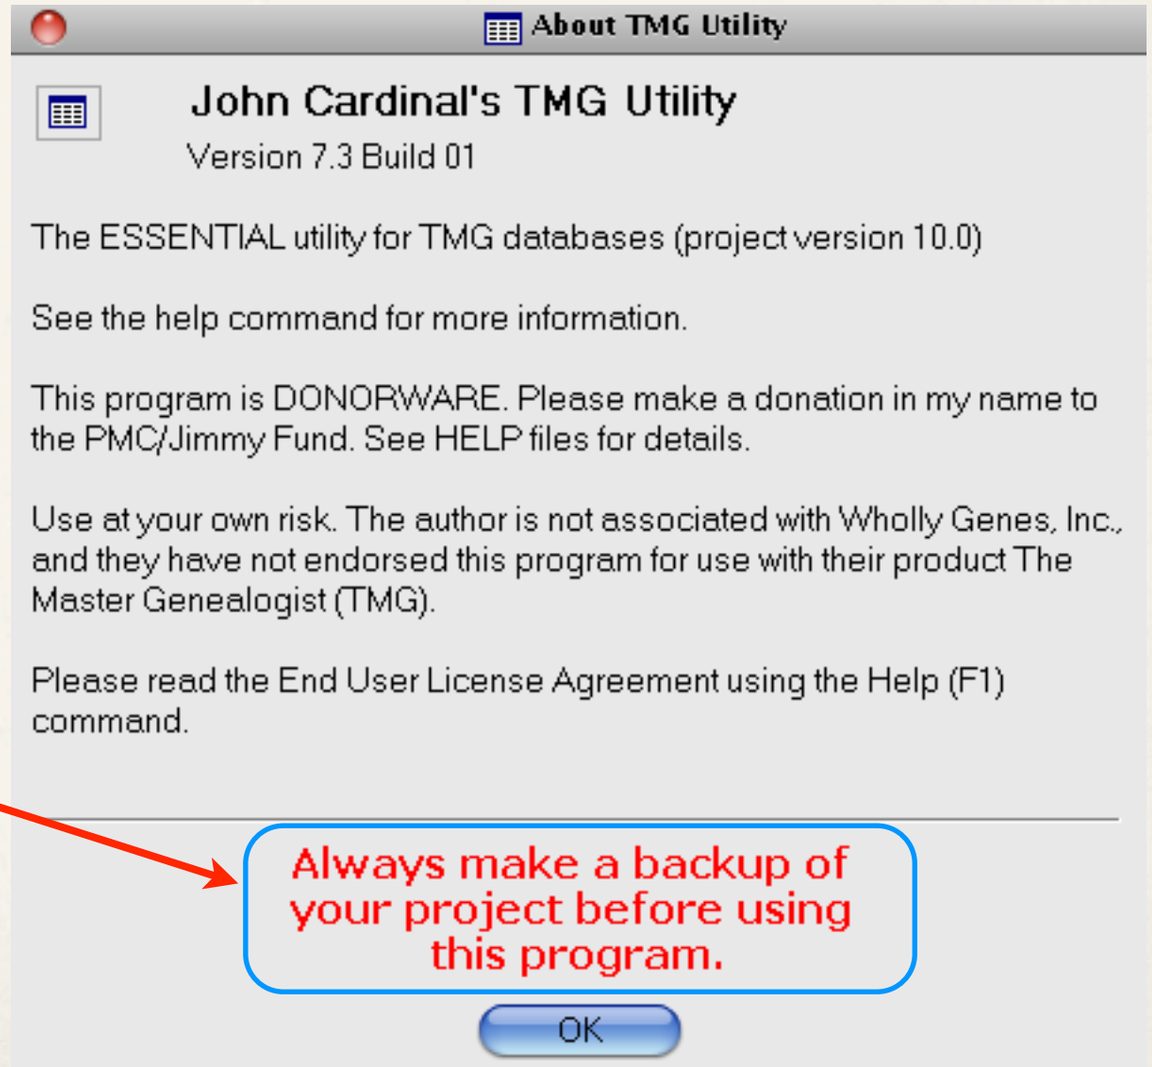


Step 1: End

- Make note of TMG ID for each person in the photo
- Make a project backup (now or when exiting TMG)
- Exit TMG

Step 2: TMG Utility

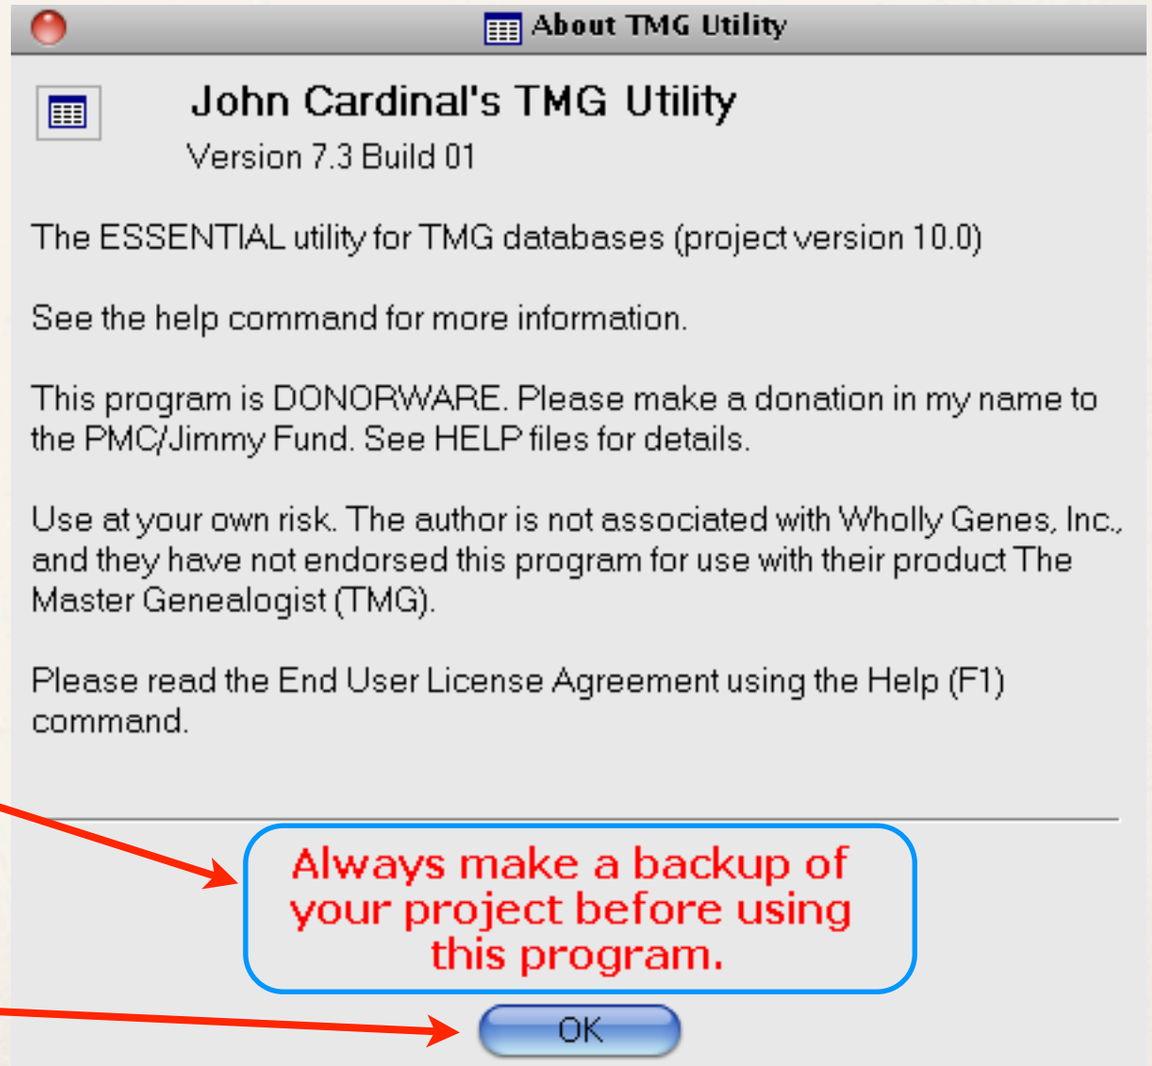
This is the TMG Utility splash screen



1. As John Cardinal has been heard to say more than once: "You have been warned."

Step 2: TMG Utility

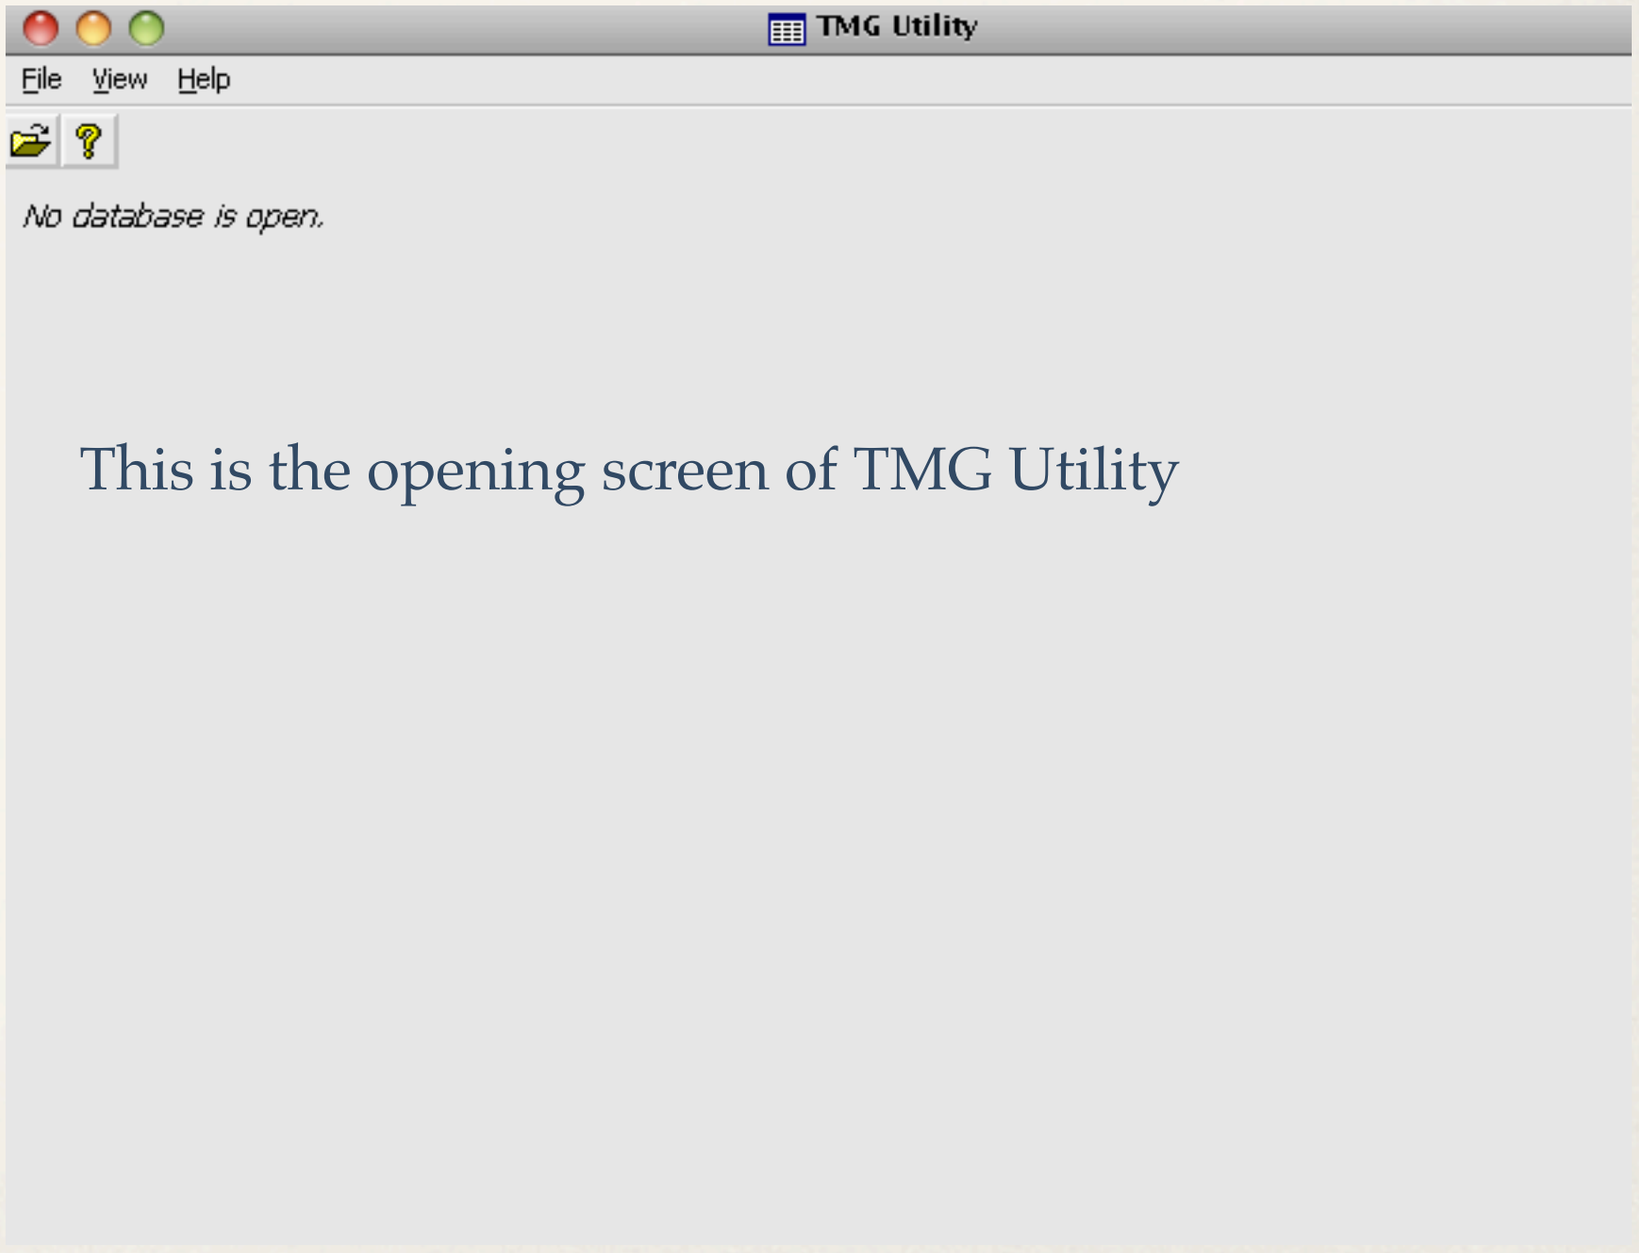
This is the TMG Utility splash screen



1. As John Cardinal has been heard to say more than once: "You have been warned."

2. Click OK

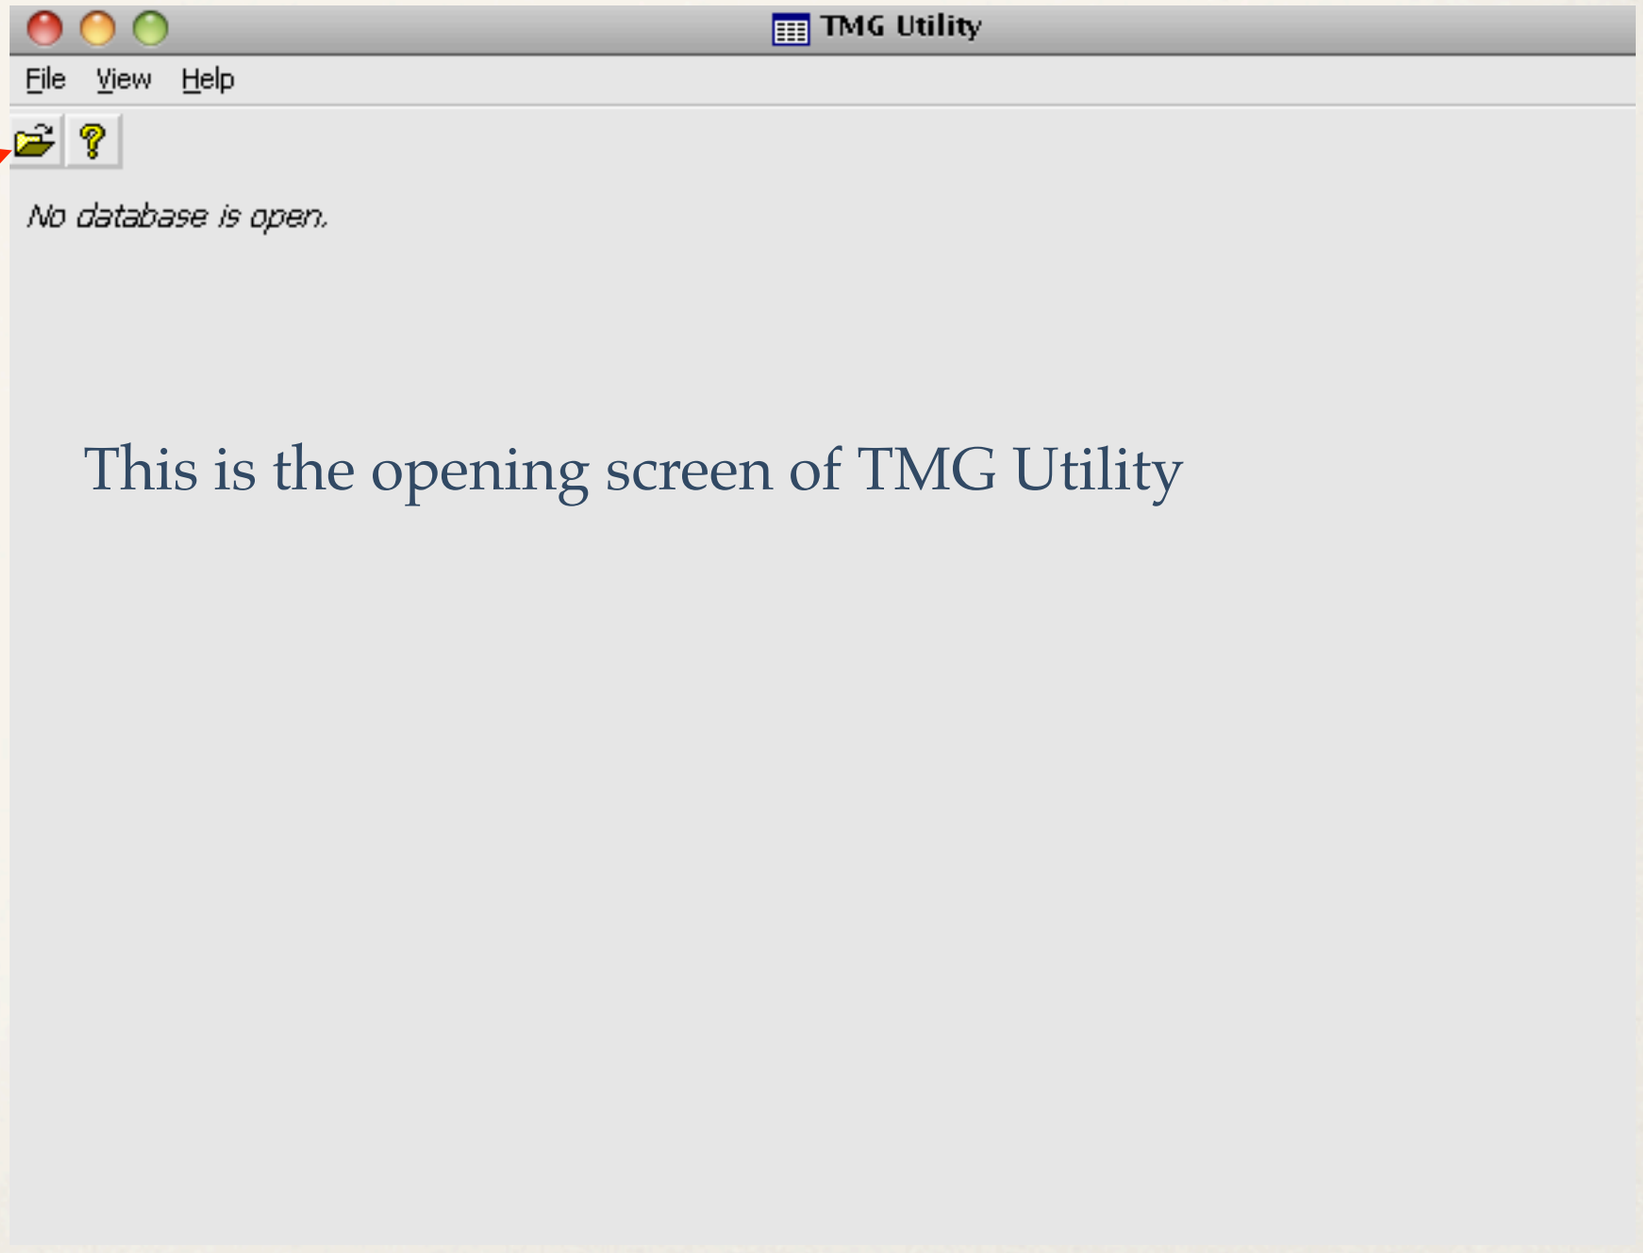
Step 2: TMG Utility



This is the opening screen of TMG Utility

Step 2: TMG Utility

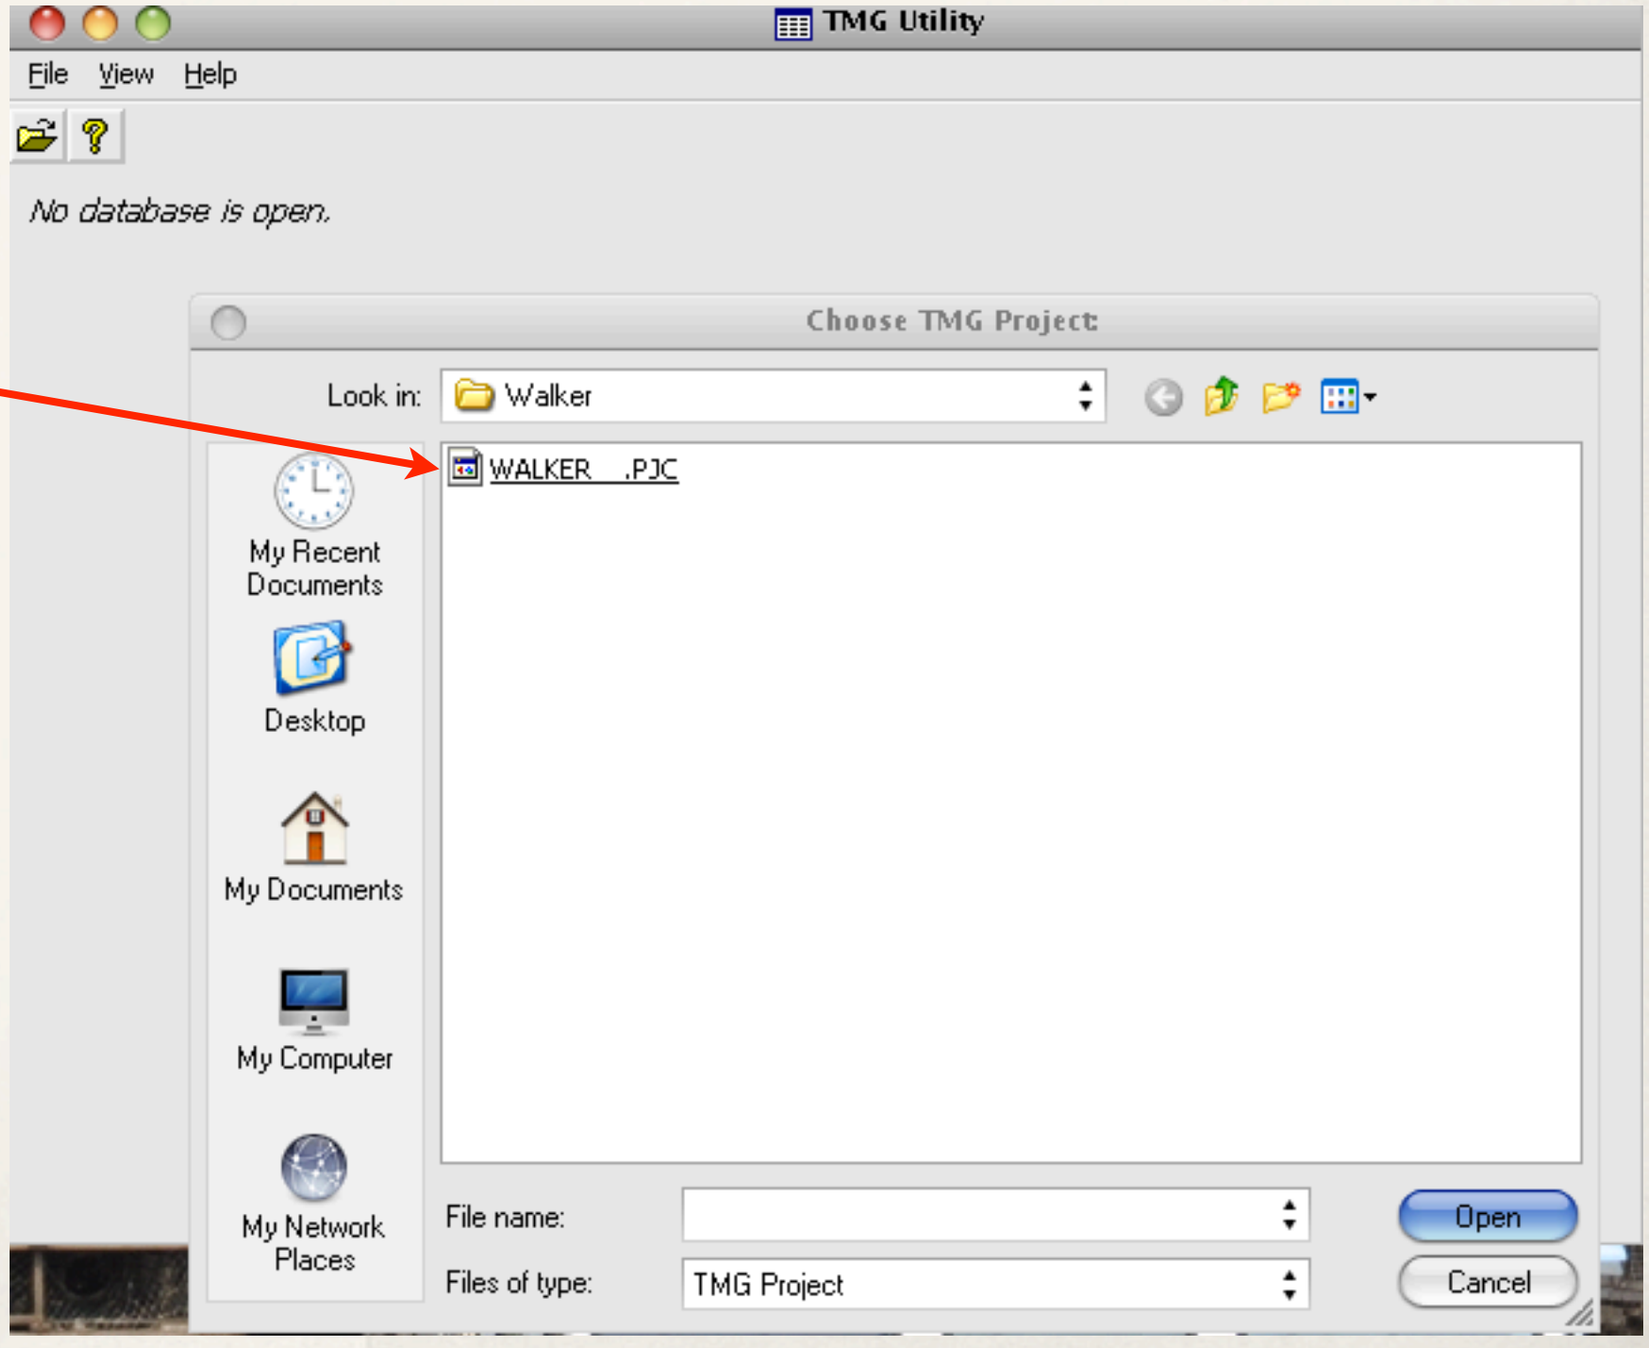
3a. Click the open folder icon



This is the opening screen of TMG Utility

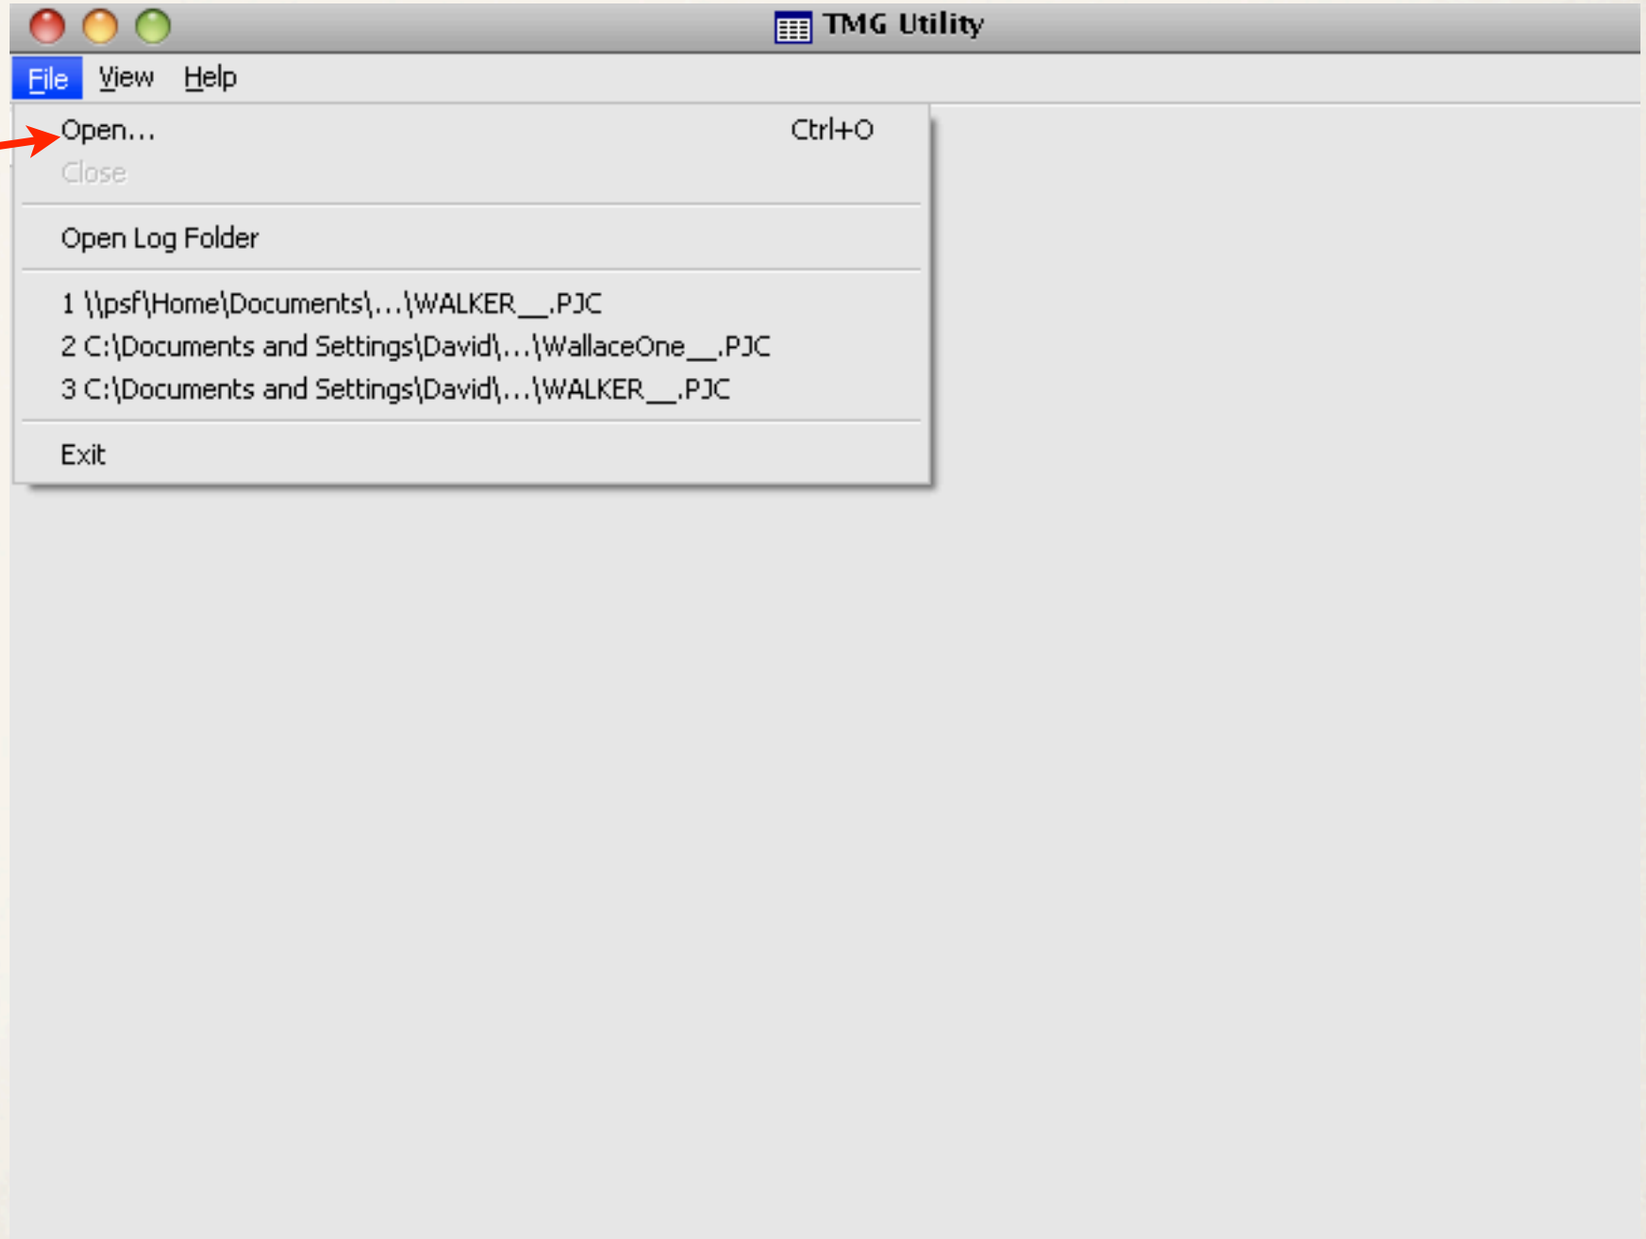
Step 2: TMG Utility

4a. Click the .pjc file.



Step 2: TMG Utility

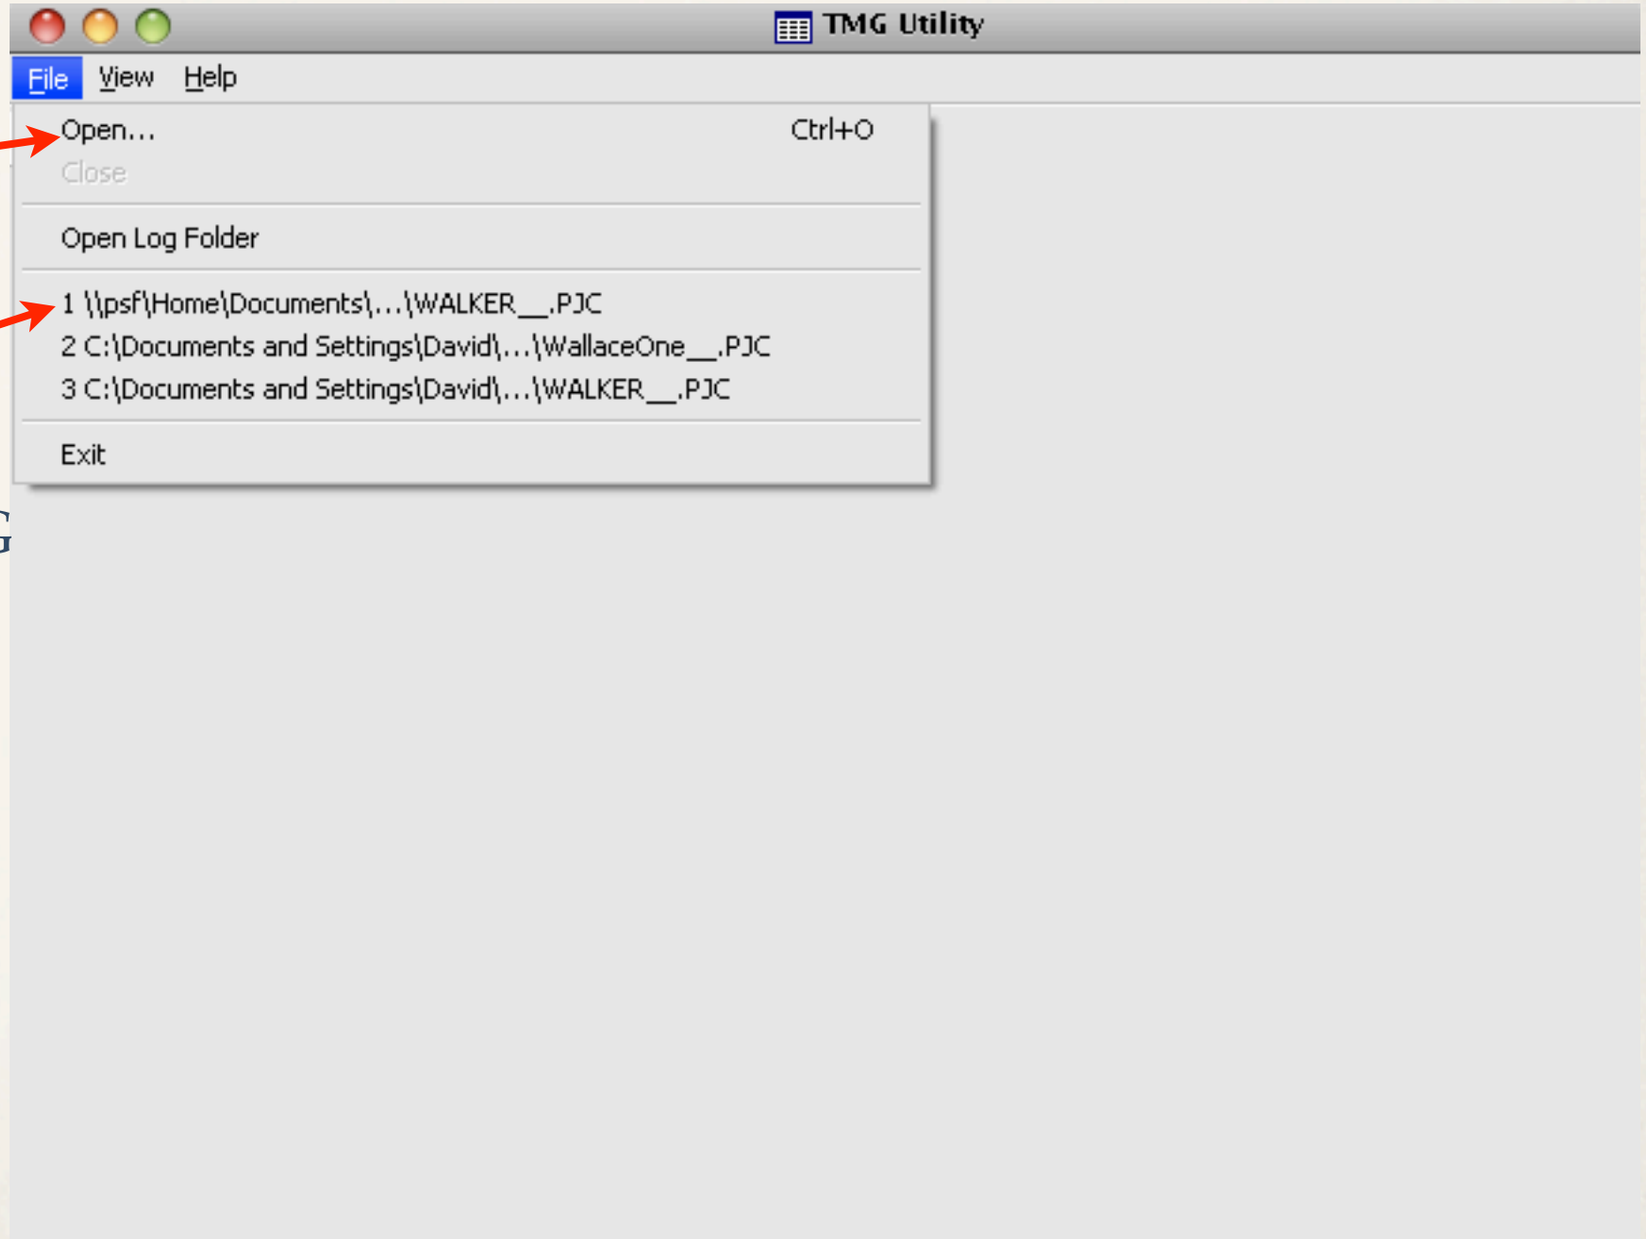
4b. Or, click **Open** to retrieve your TMG project .pjc file



Step 2: TMG Utility

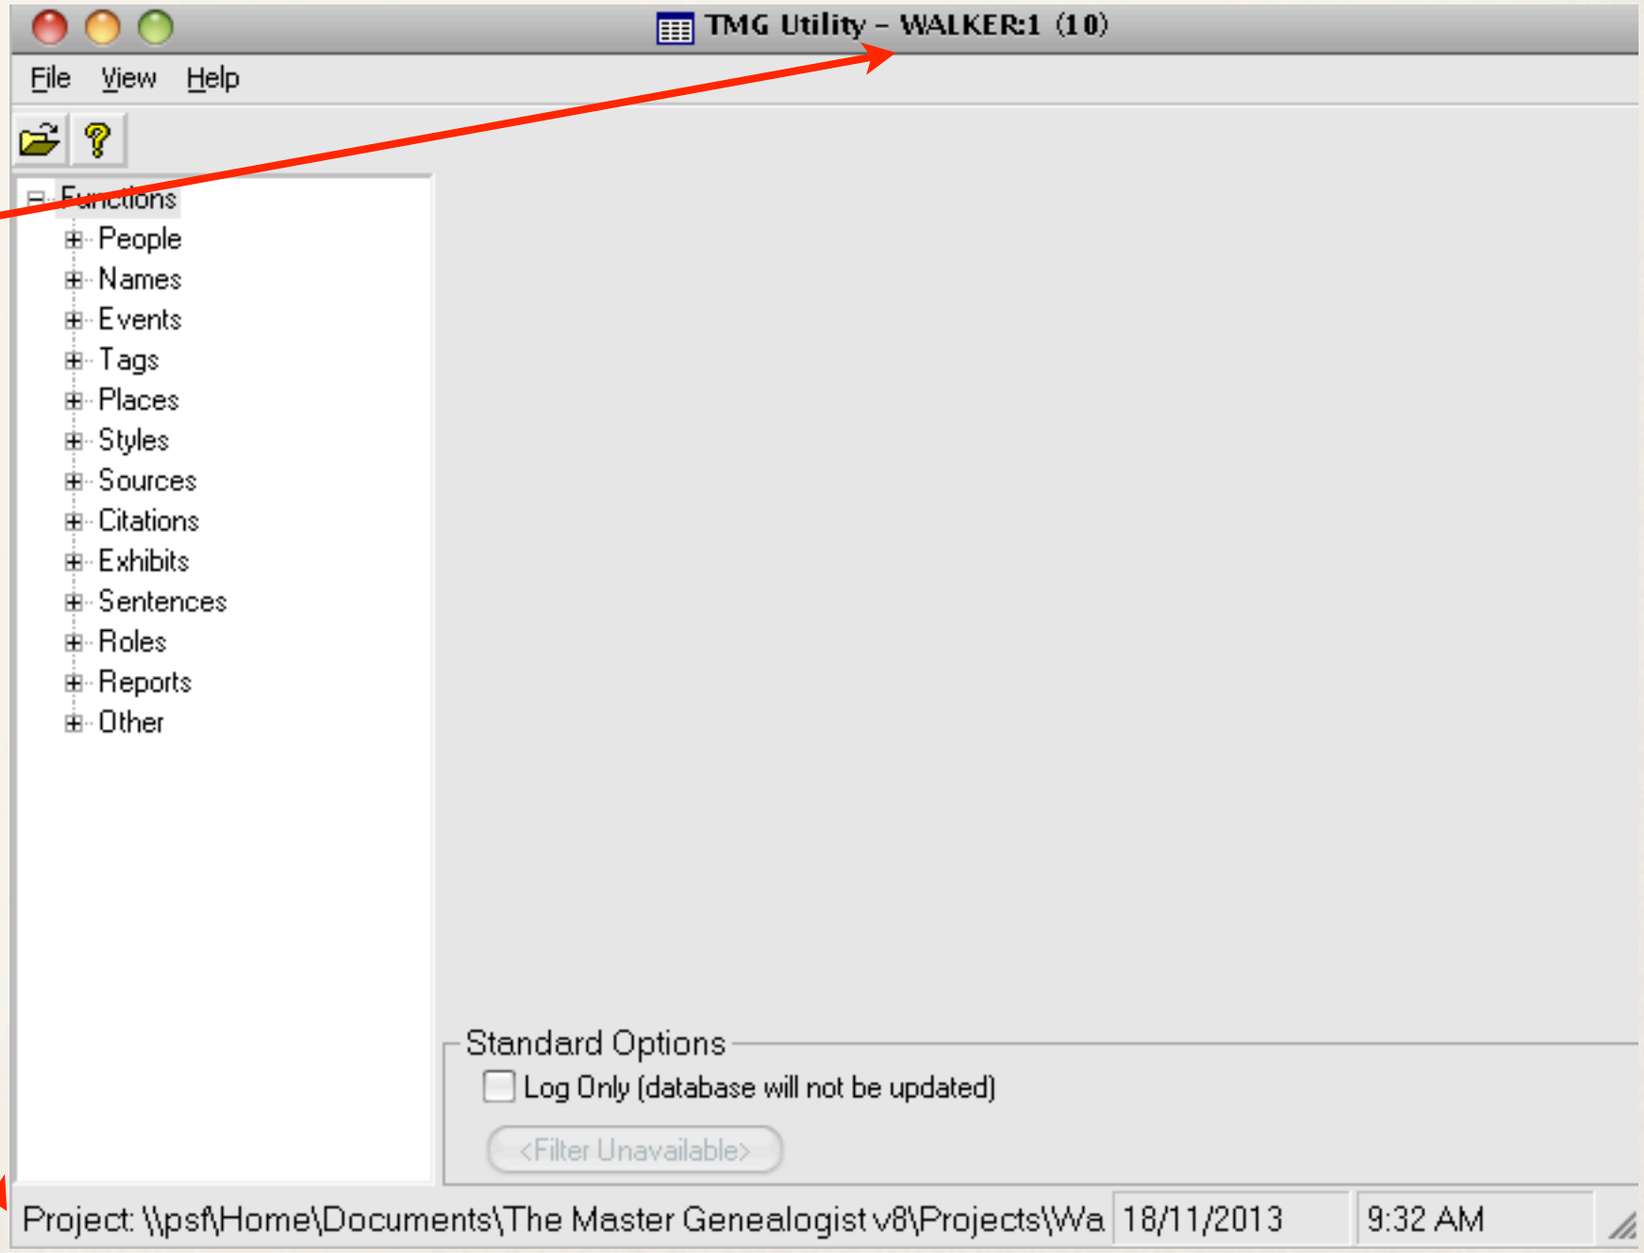
4b. Or, click **Open** to retrieve your TMG project .pjc file

4c. Or select the .pjc file from a previously used project in TMG Utility



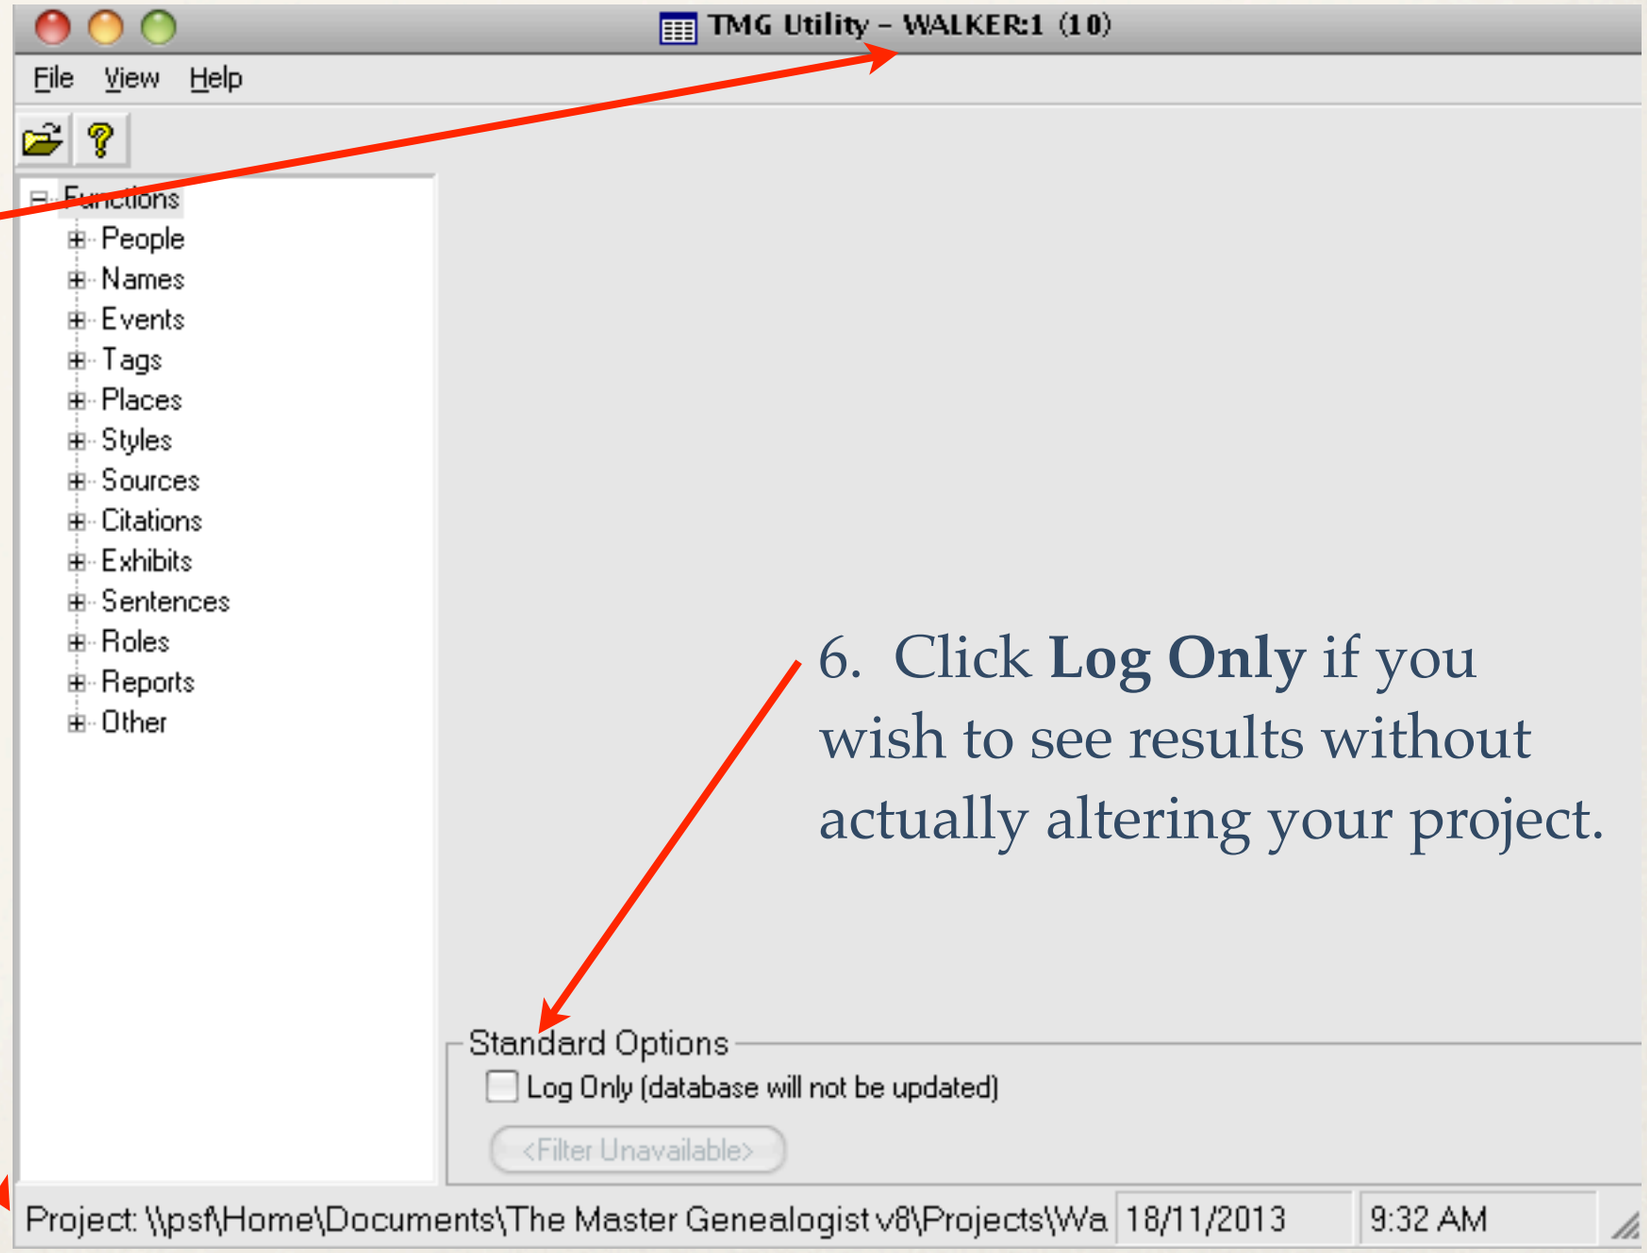
Step 2: TMG Utility

5. Project file is now ready to process.



Step 2: TMG Utility

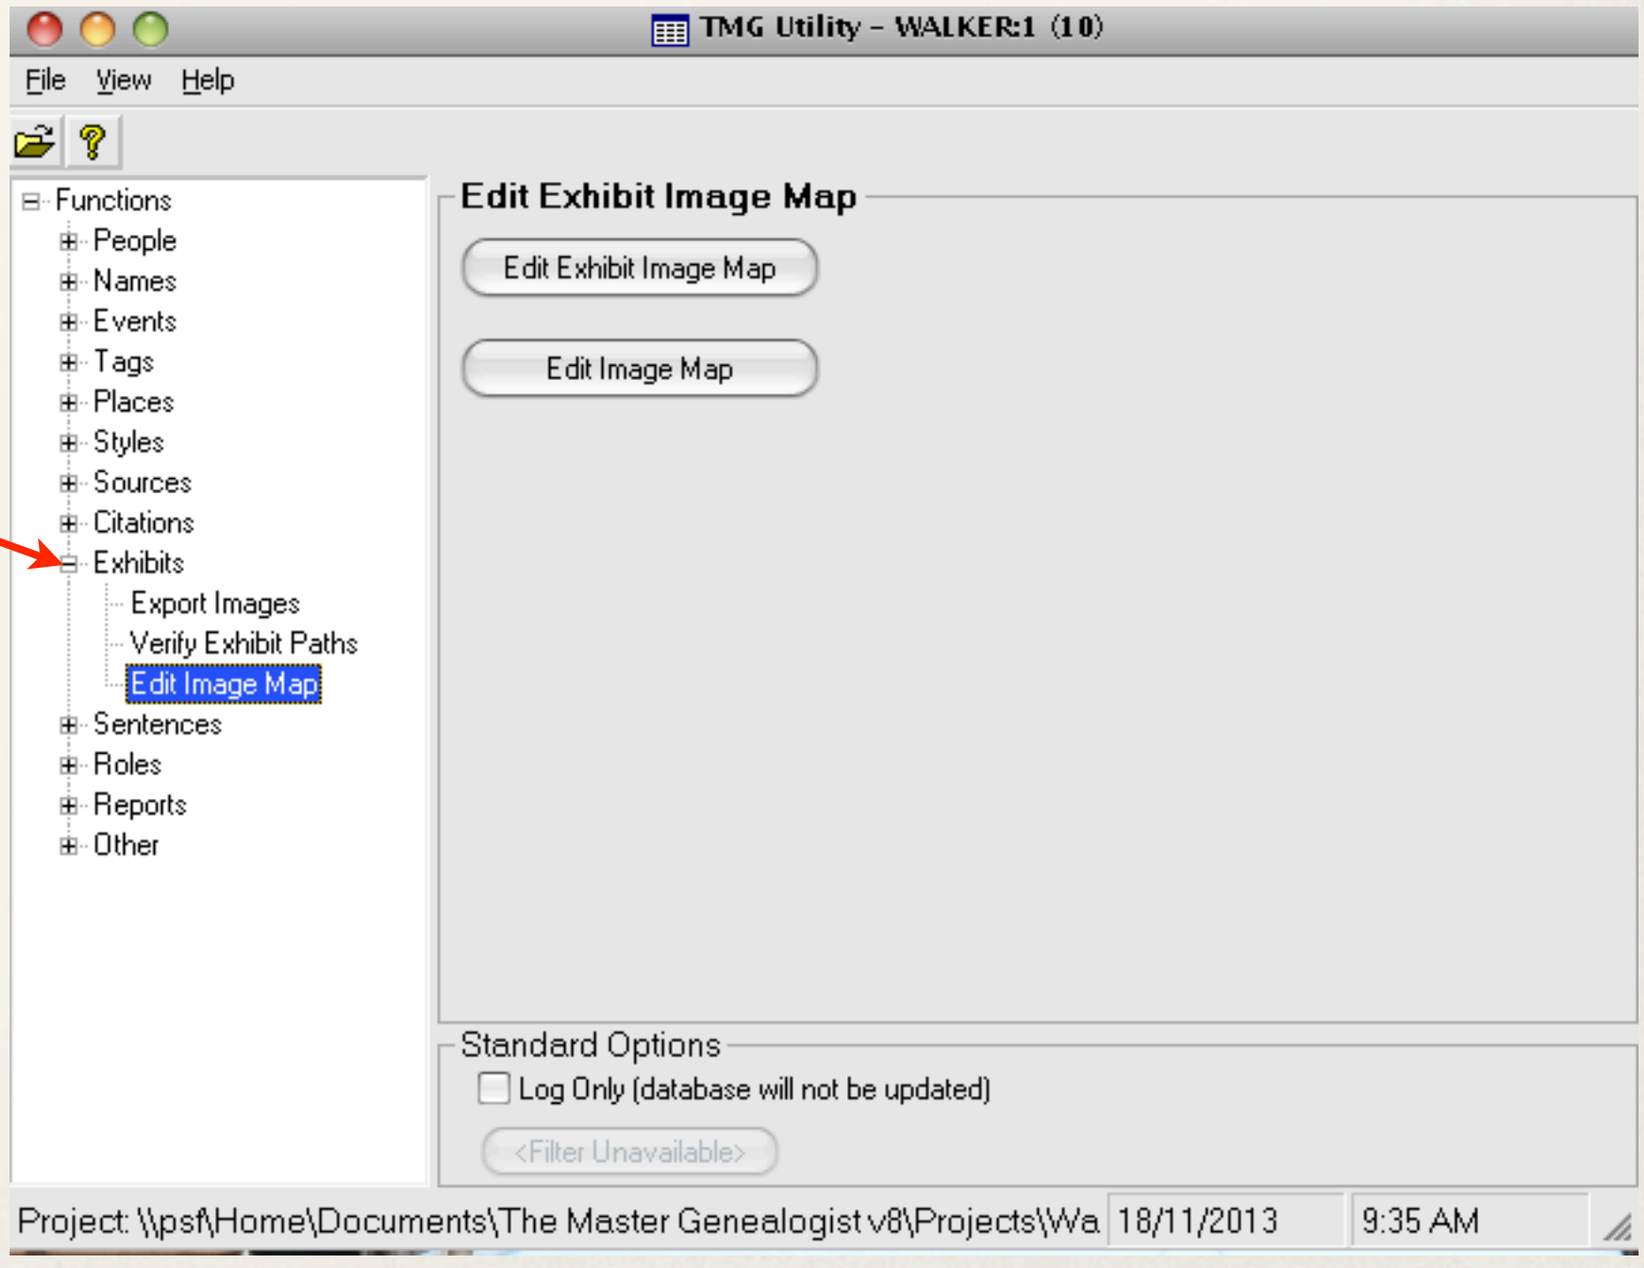
5. Project file is now ready to process.



6. Click **Log Only** if you wish to see results without actually altering your project.

Step 2: TMG Utility

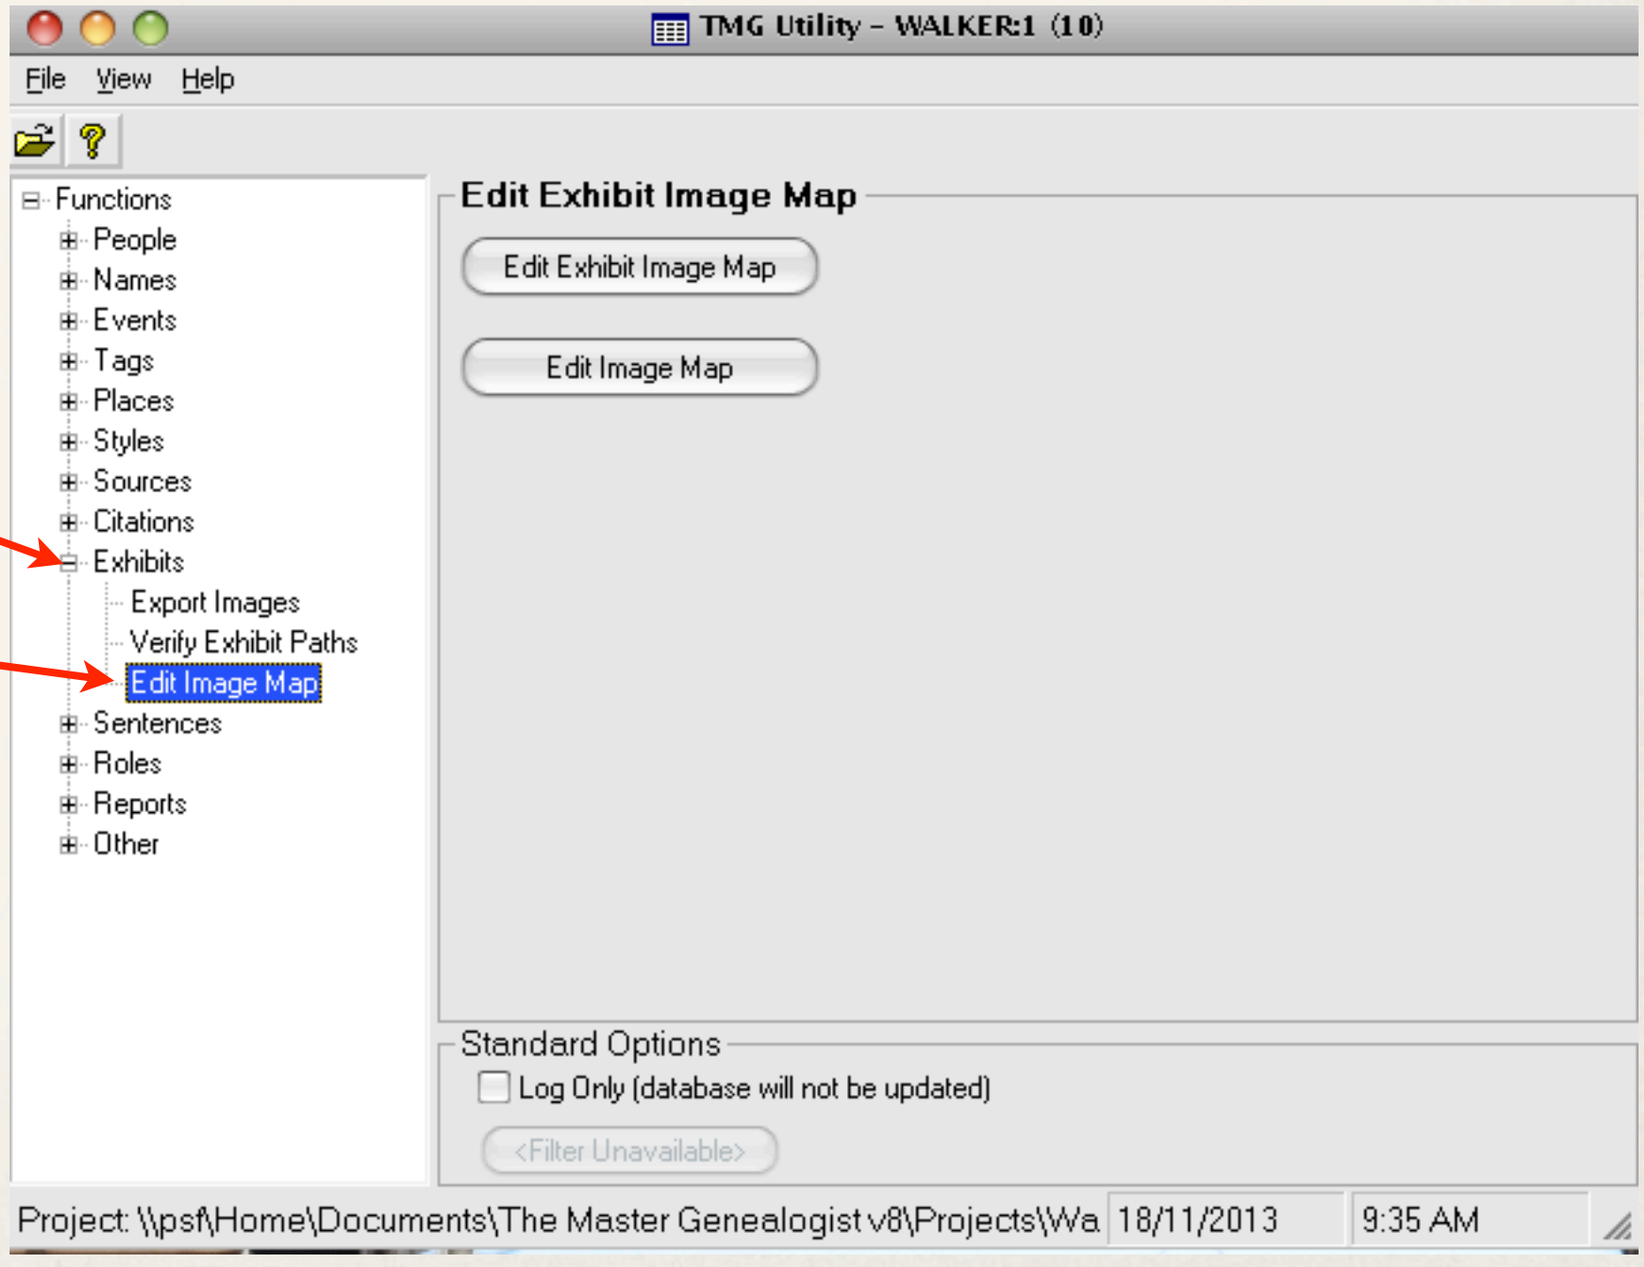
7. Click + **Exhibits** to display a list of options.



Step 2: TMG Utility

7. Click + **Exhibits** to display a list of options.

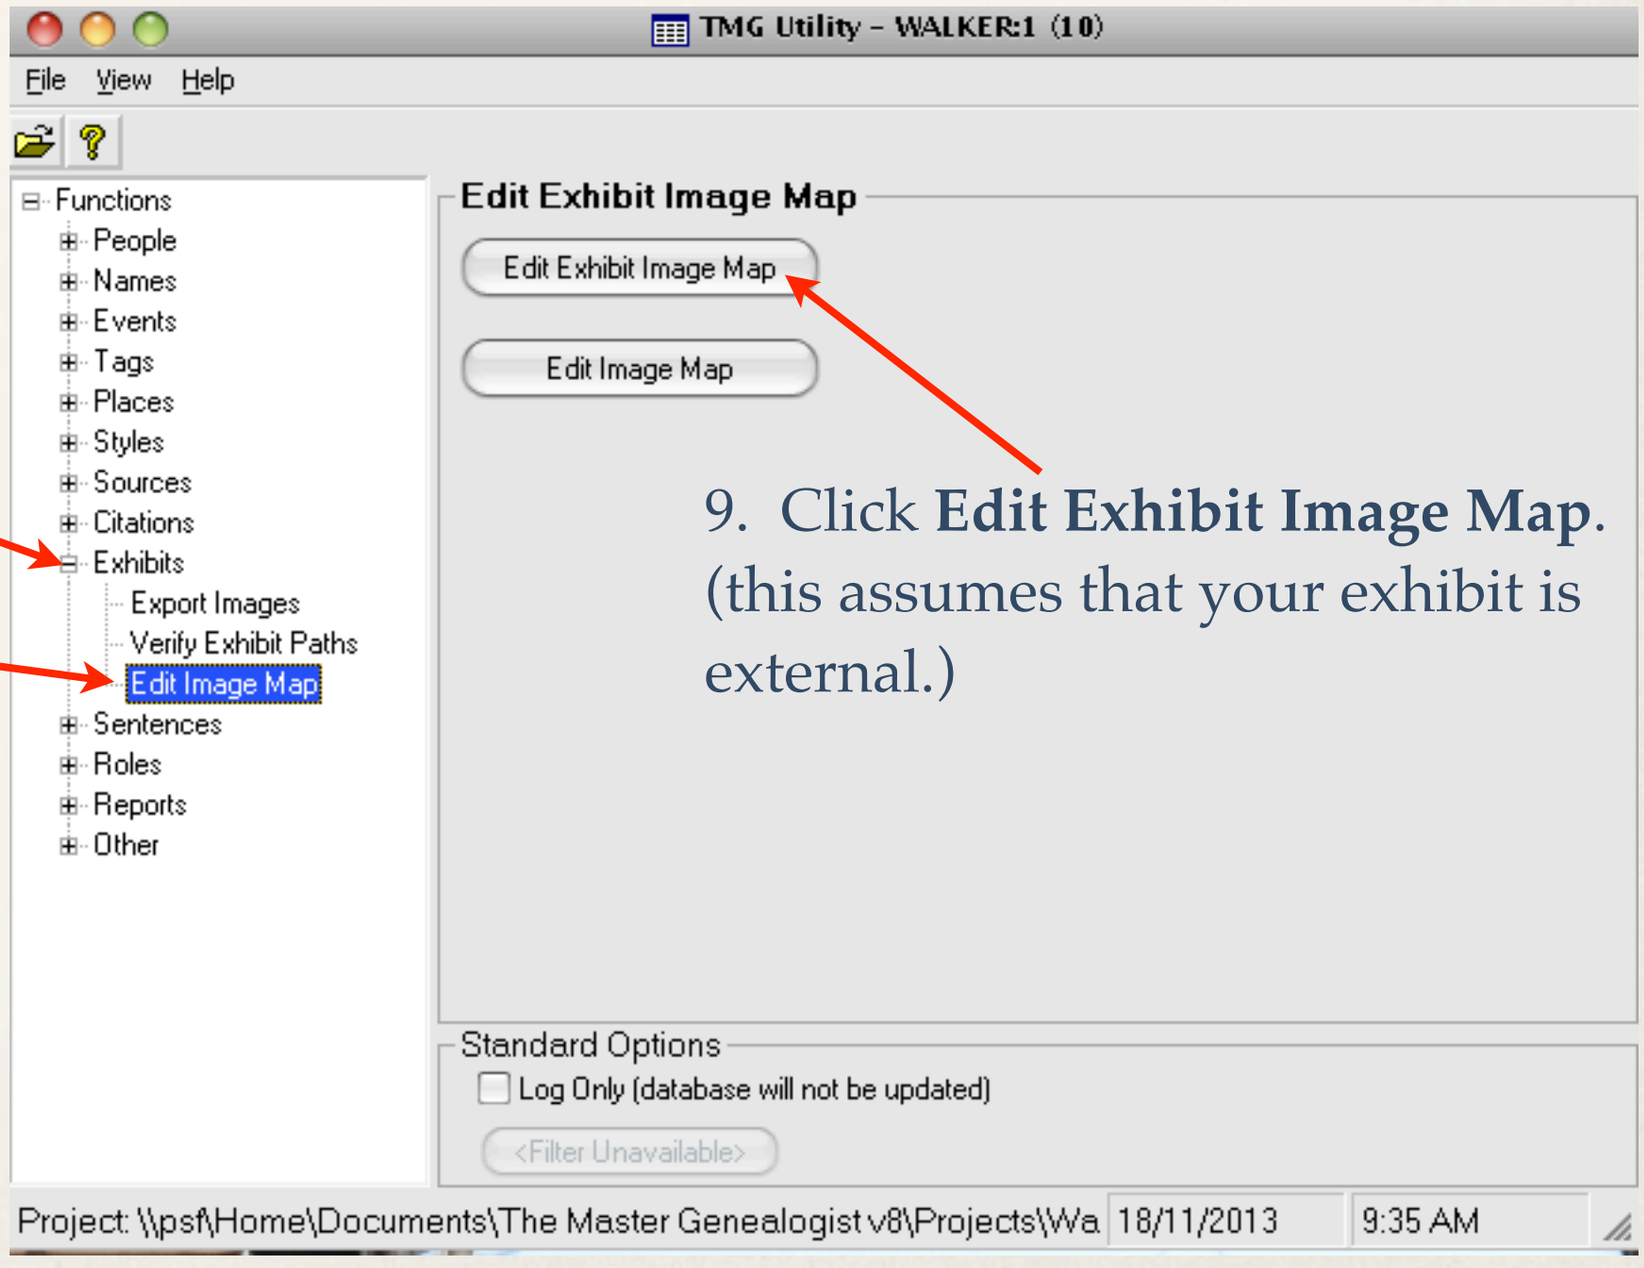
8. Click **Edit Image Map**.



Step 2: TMG Utility

7. Click + **Exhibits** to display a list of options.

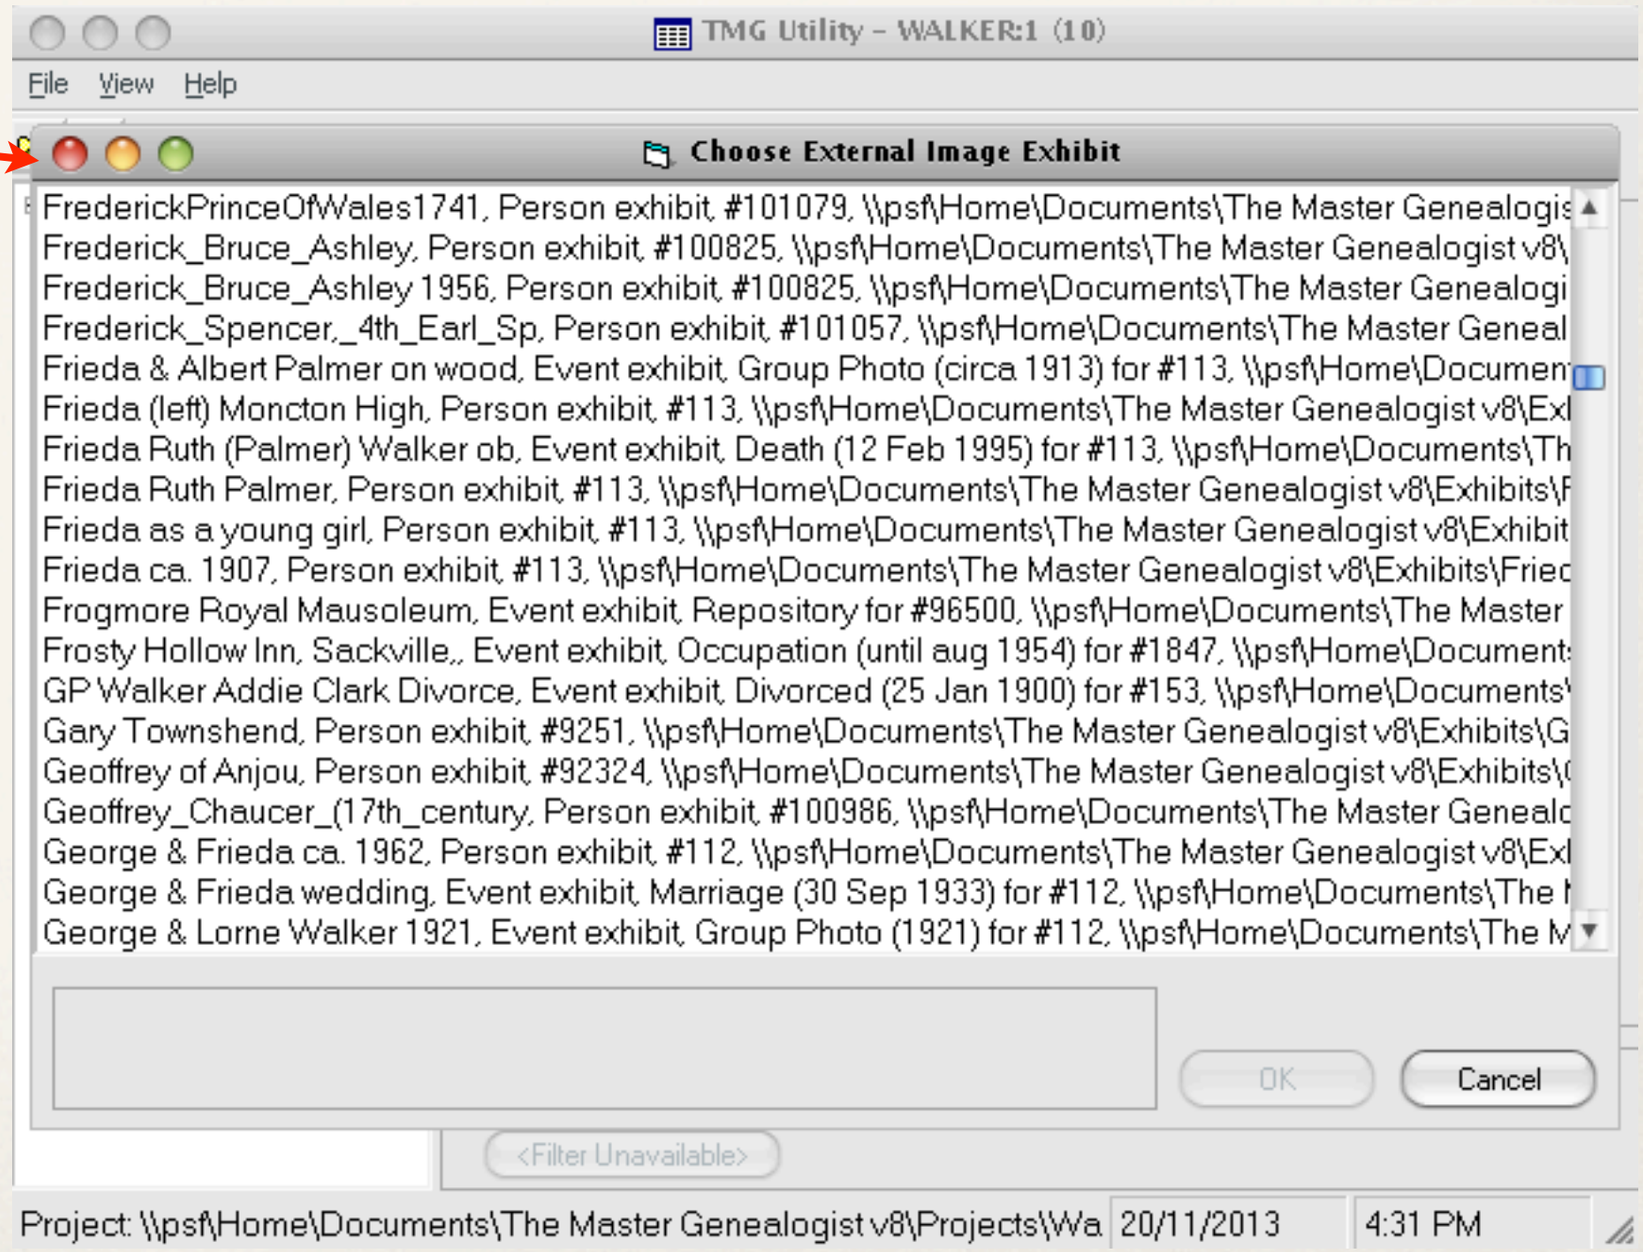
8. Click **Edit Image Map**.



9. Click **Edit Exhibit Image Map**. (this assumes that your exhibit is external.)

Step 2: TMG Utility

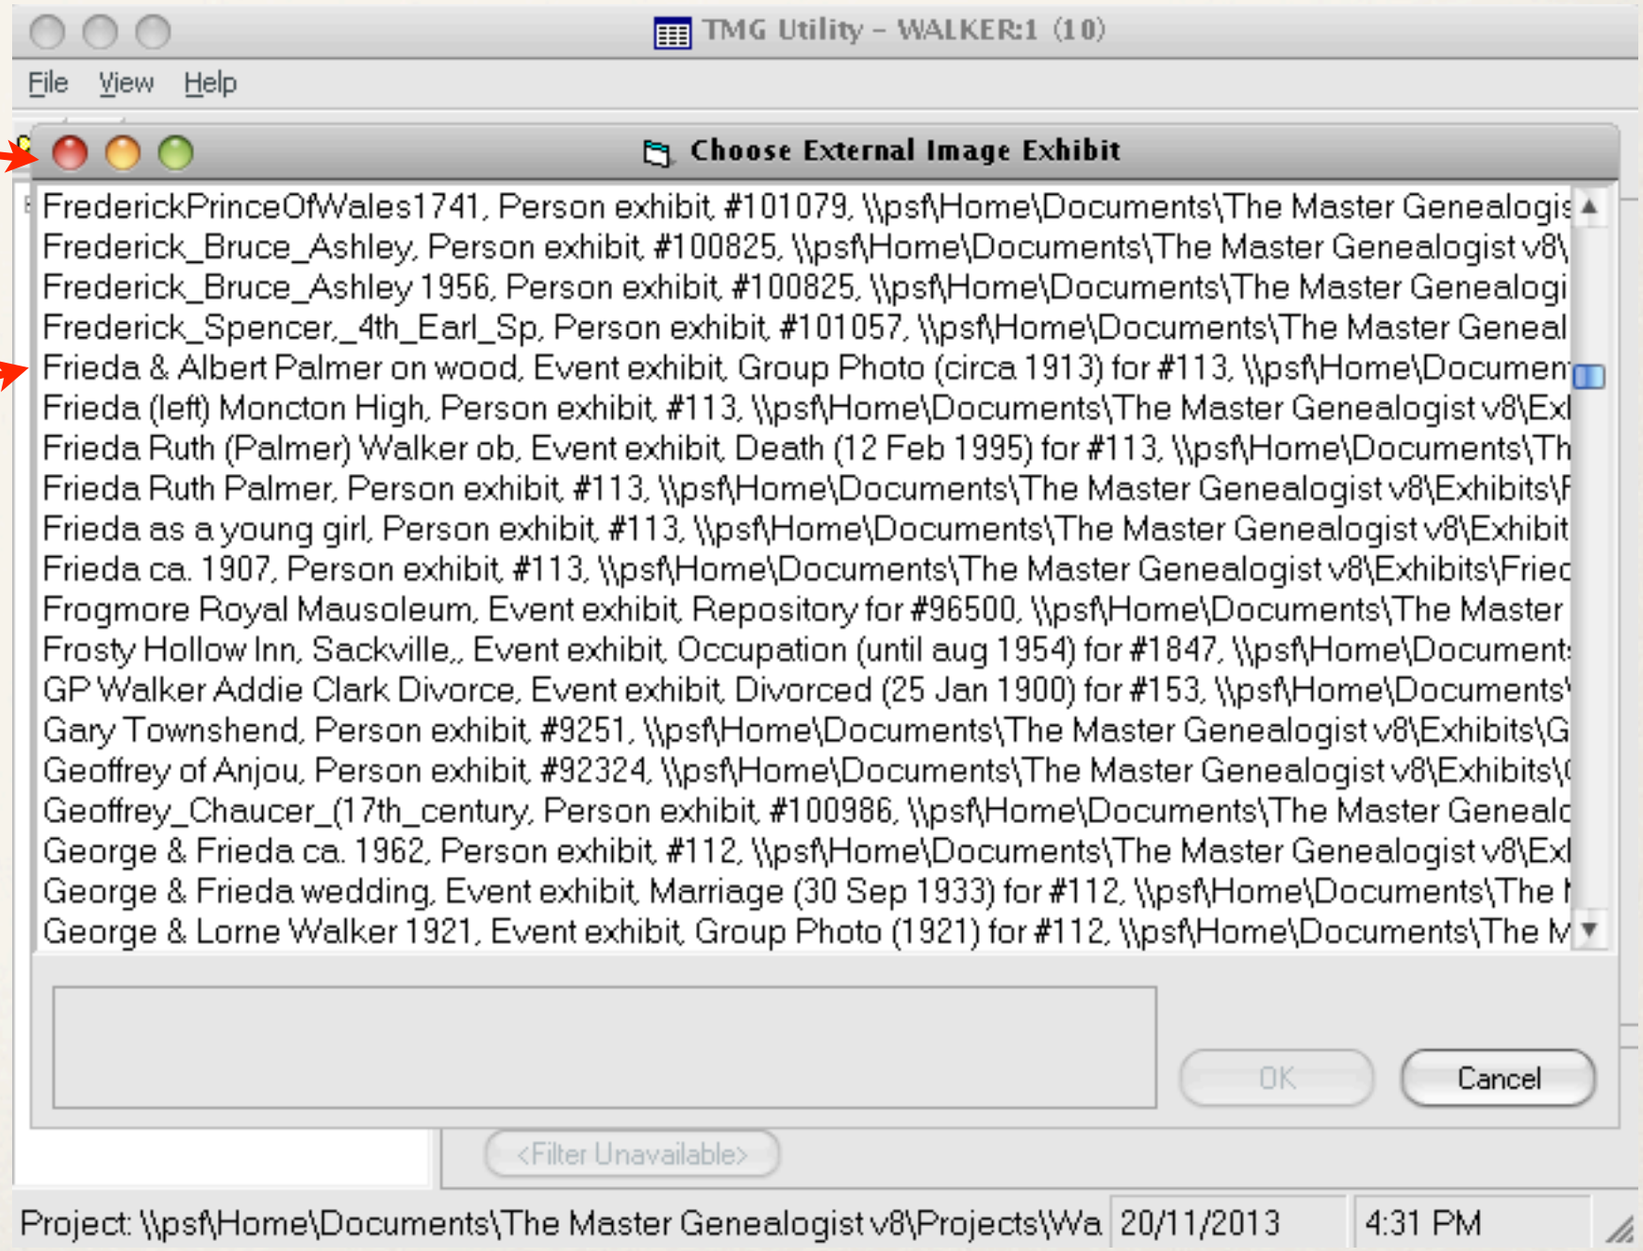
10. A list of External Image Exhibits appears.



Step 2: TMG Utility

10. A list of External Image Exhibits appears.

11. Select the file to be processed.



Step 2: TMG Utility

12. The Image Map Editor opens, displaying the chosen exhibit.

Step 2: TMG Utility

13. The mouse cursor displayed anywhere within the exhibit frame will change to a '+'.

Step 2: TMG Utility

13. The mouse cursor displayed anywhere within the exhibit frame will change to a '+'.

14. While holding the left mouse button down draw boxes around each face in the exhibit.

Step 2: TMG Utility

15. Boxes are displayed for each person

Step 2: TMG Utility

15. Boxes are displayed for each person

16. Highlight any of the boxes to make size and / or position adjustments.

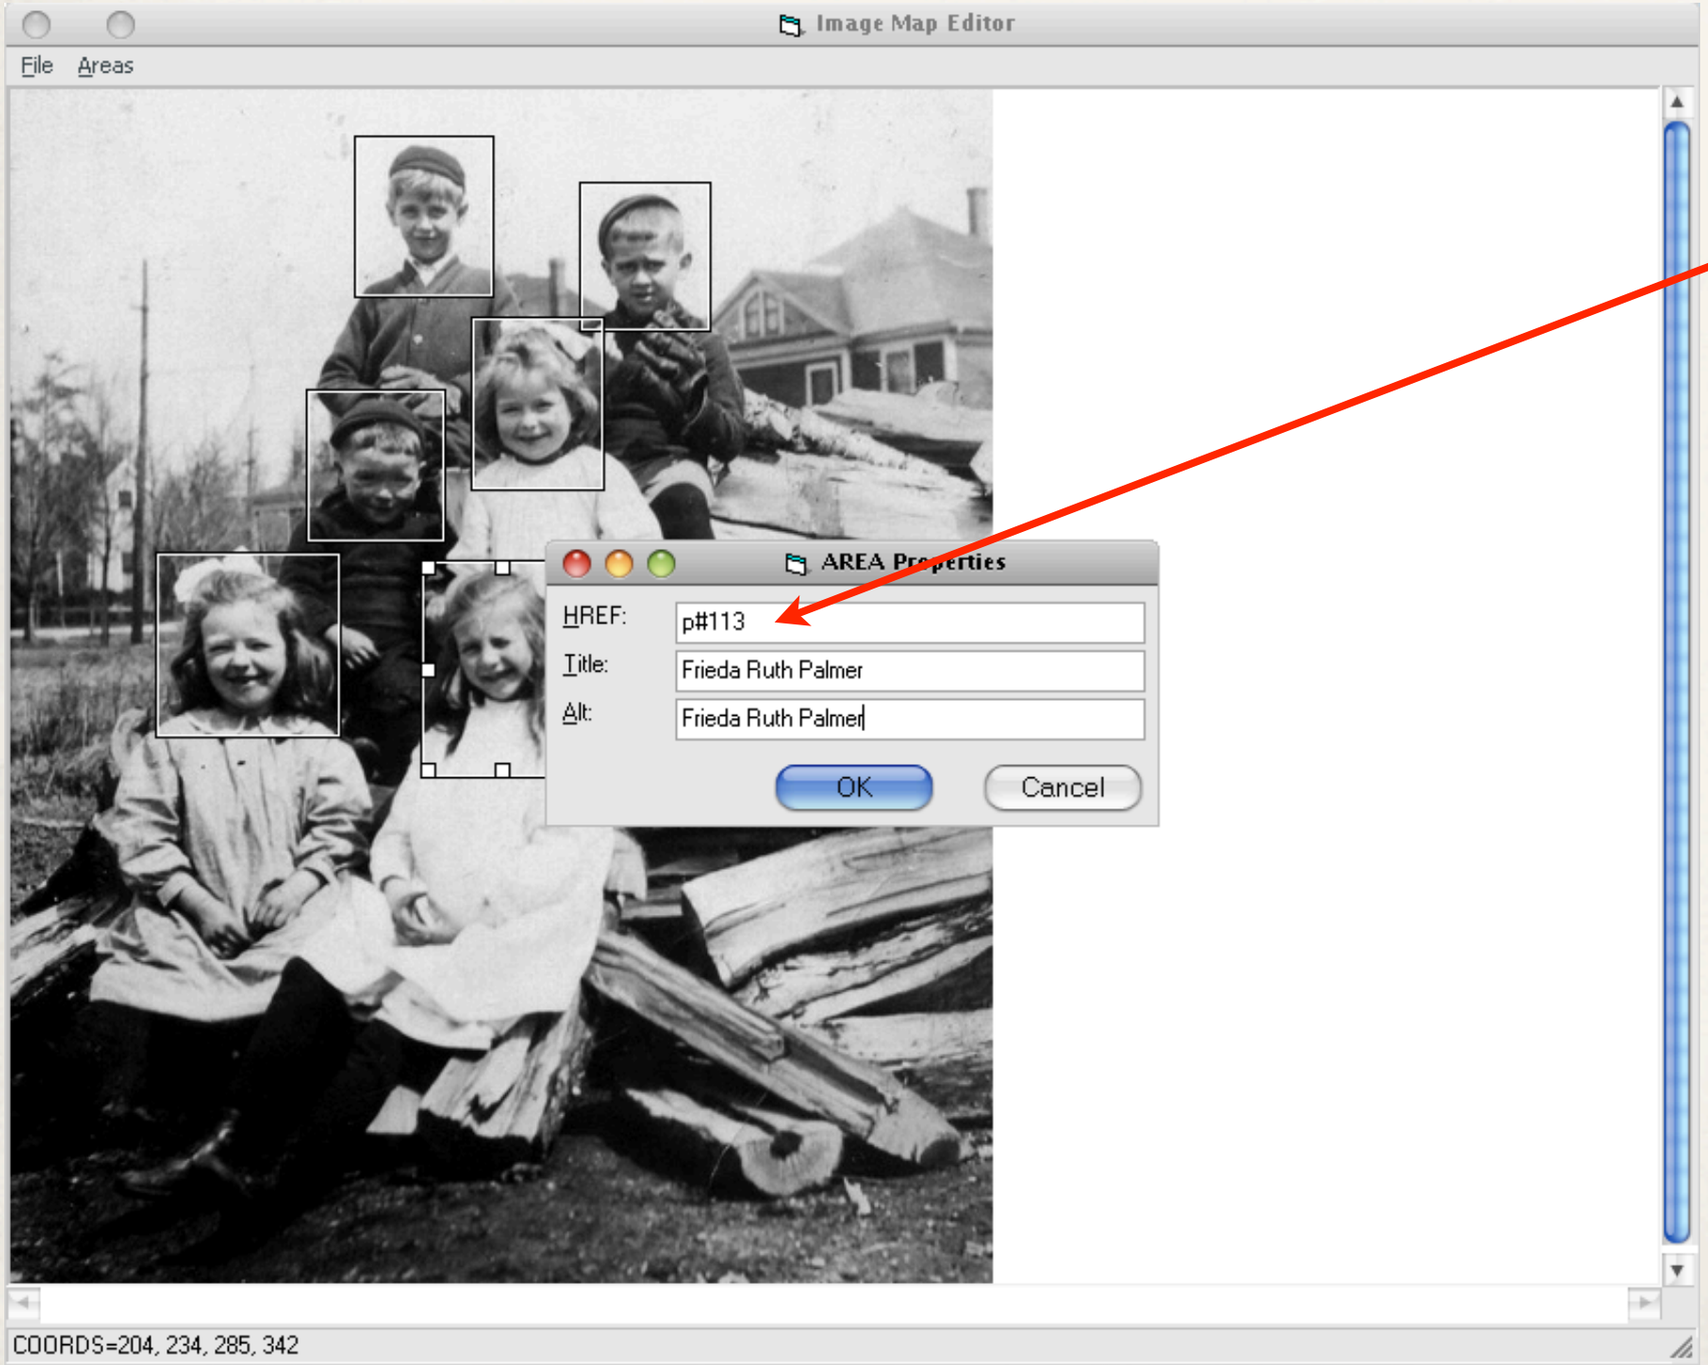
Step 2: TMG Utility

15. Boxes are displayed for each person

16. Highlight any of the boxes to make size and / or position adjustments.

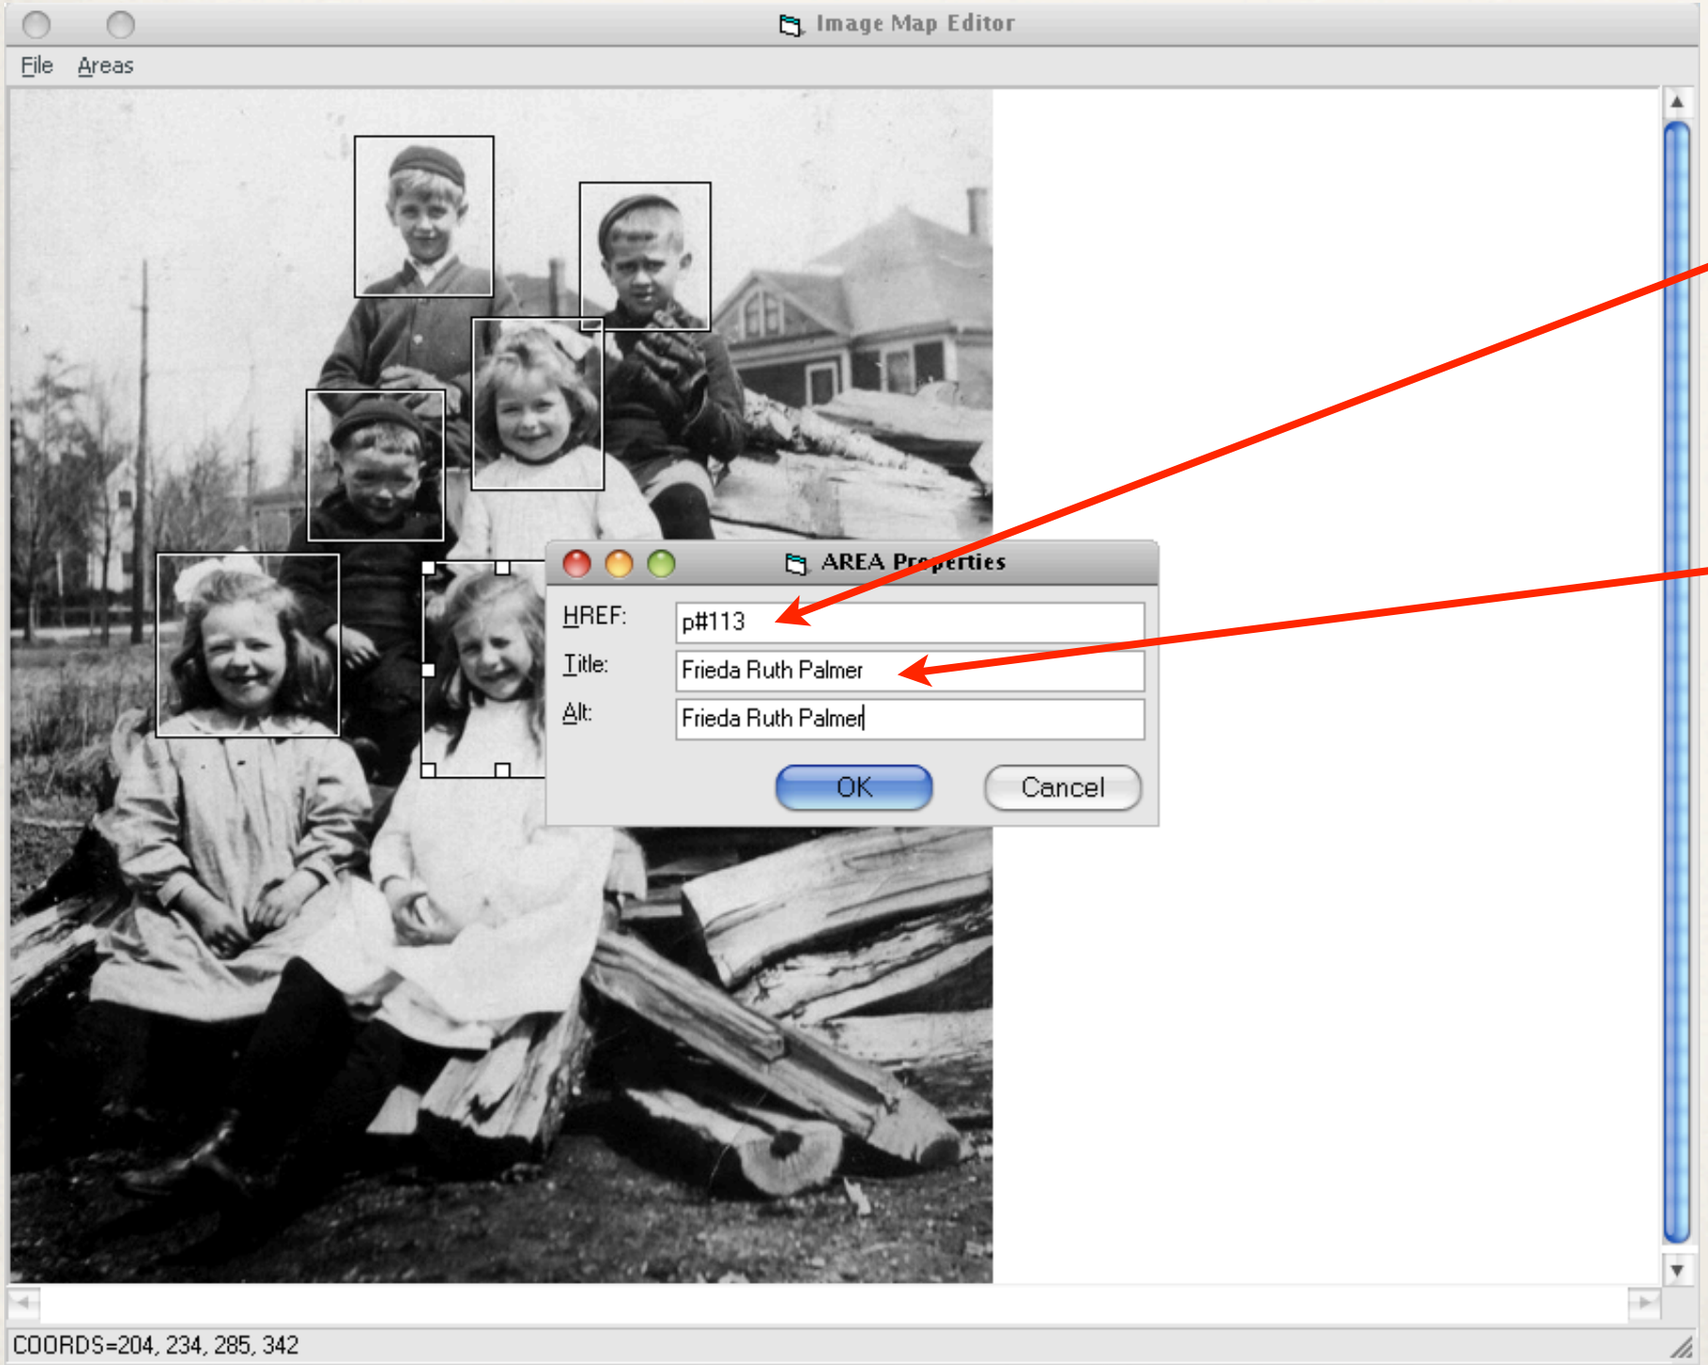
17. Double click each box to enter or edit area properties.

Step 2: TMG Utility



18. Type the TMG ID number for each person, in this format.

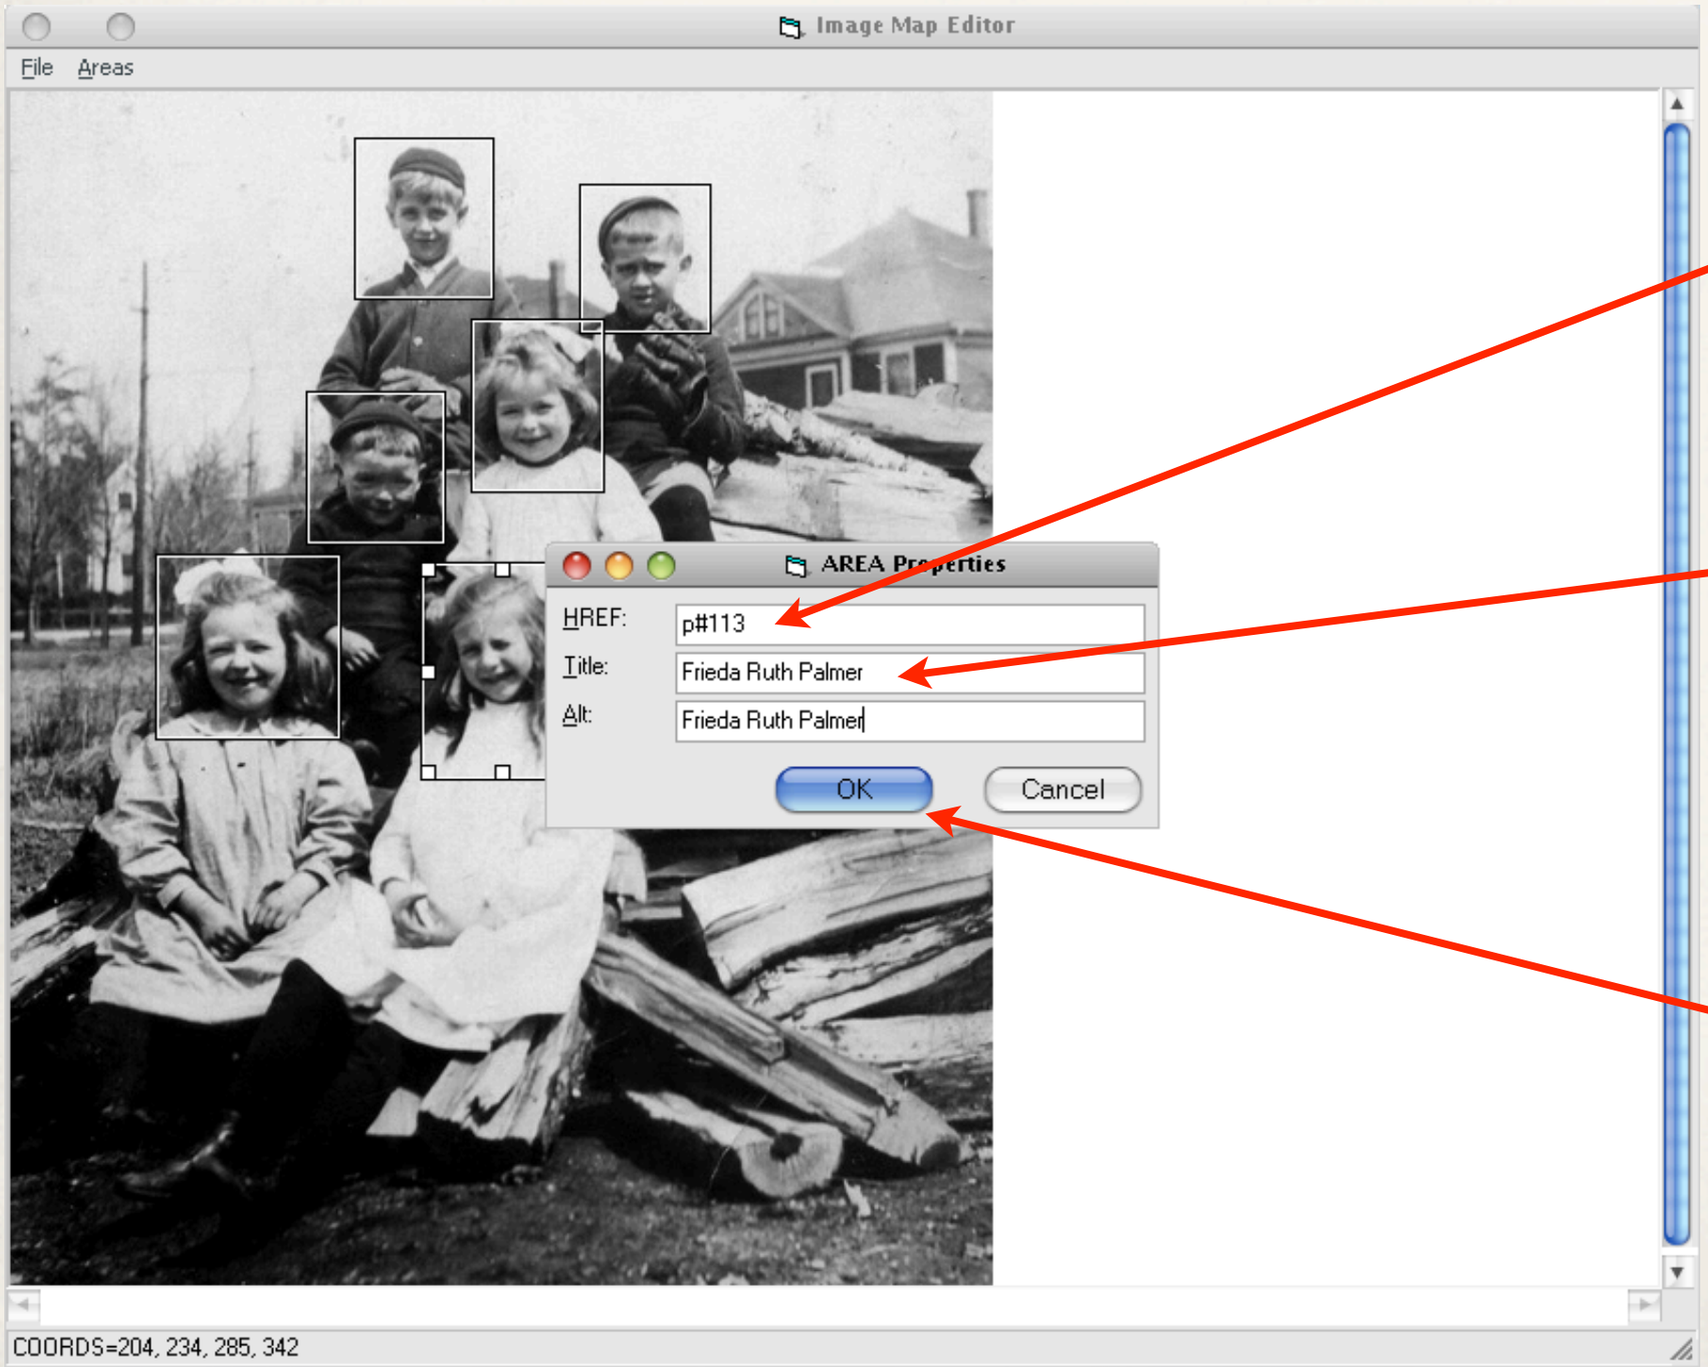
Step 2: TMG Utility



18. Type the TMG ID number for each person, in this format.

19. Type a title and alternate title for each person.

Step 2: TMG Utility

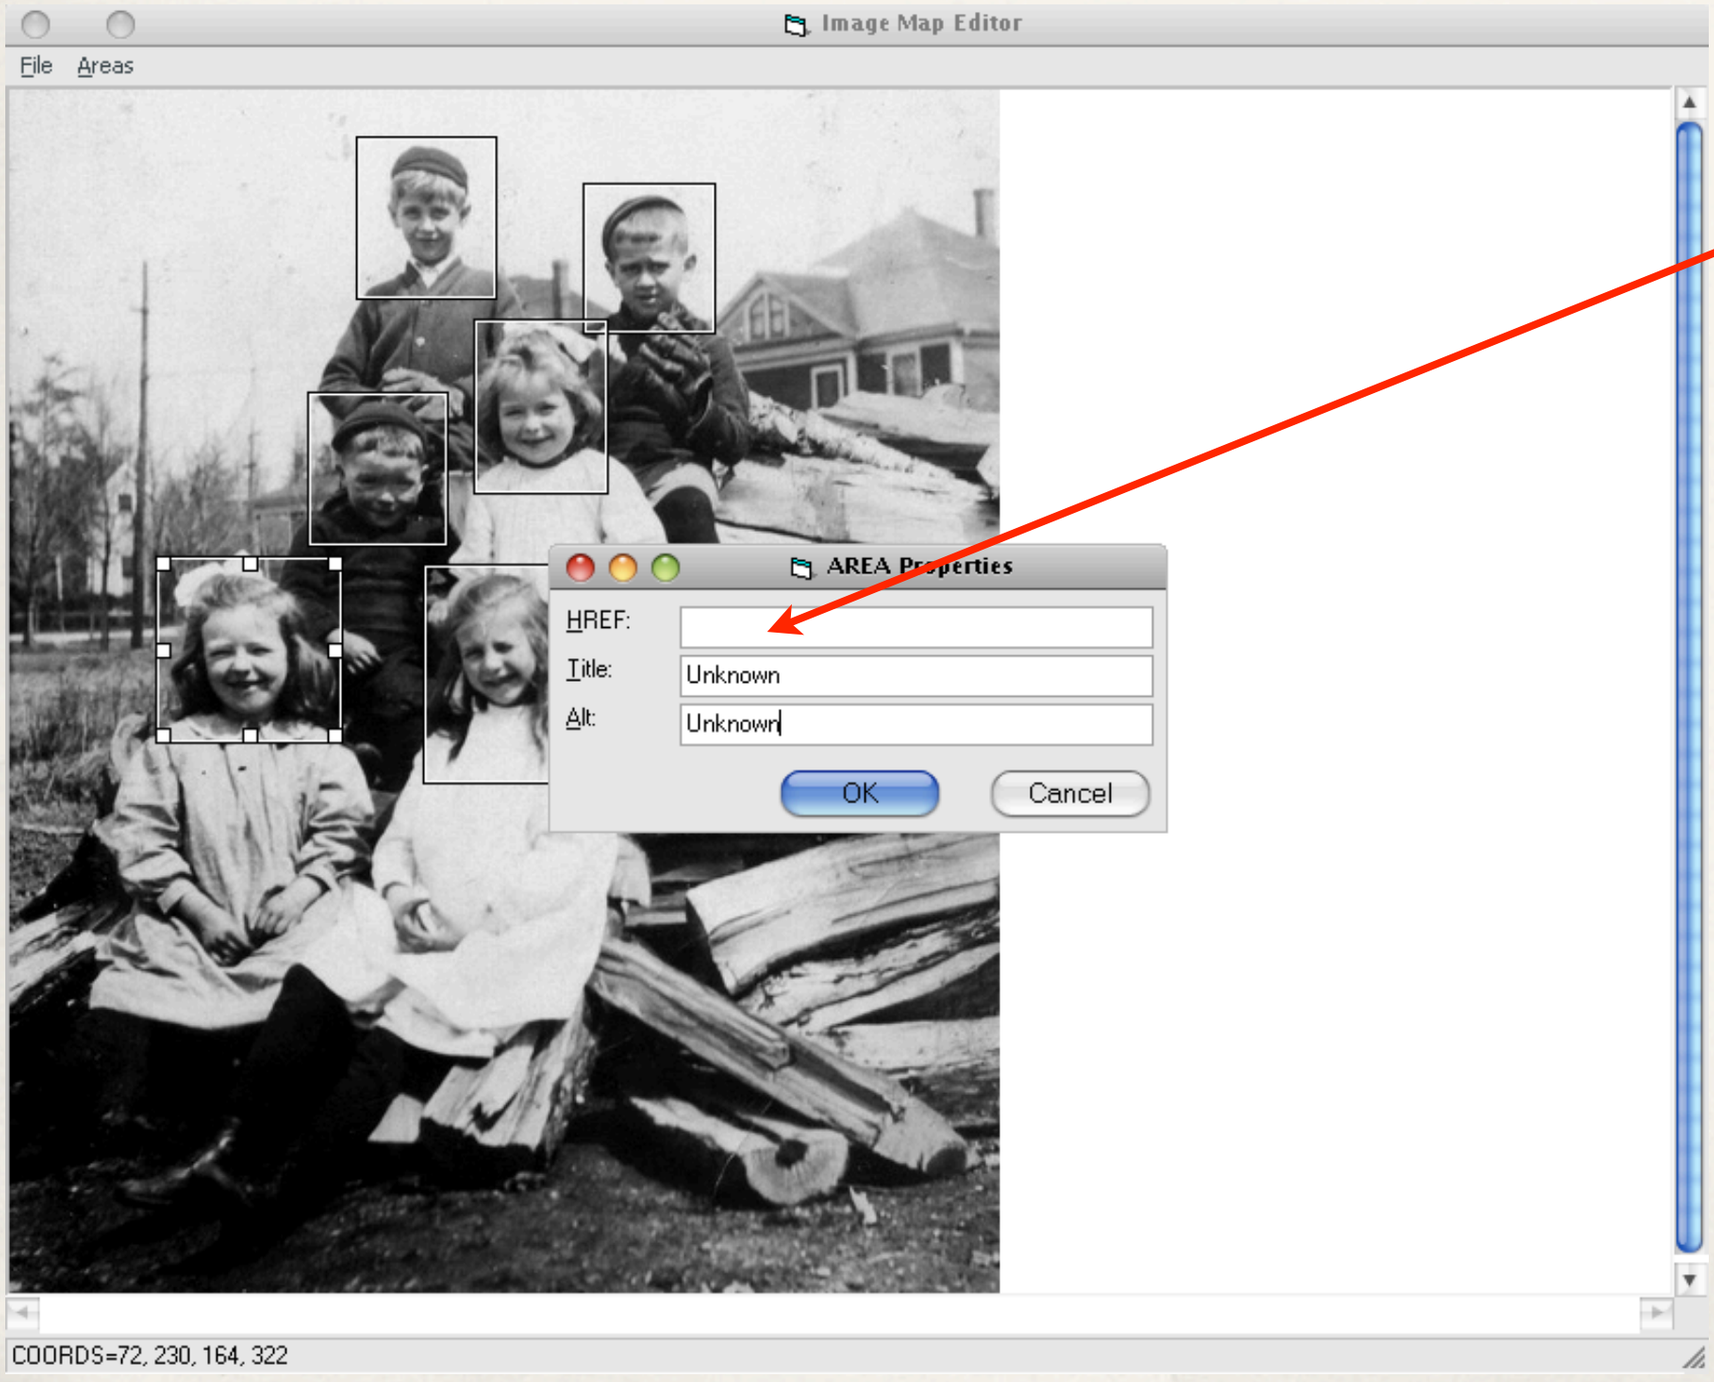


18. Type the TMG ID number for each person, in this format.

19. Type a title and alternate title for each person.

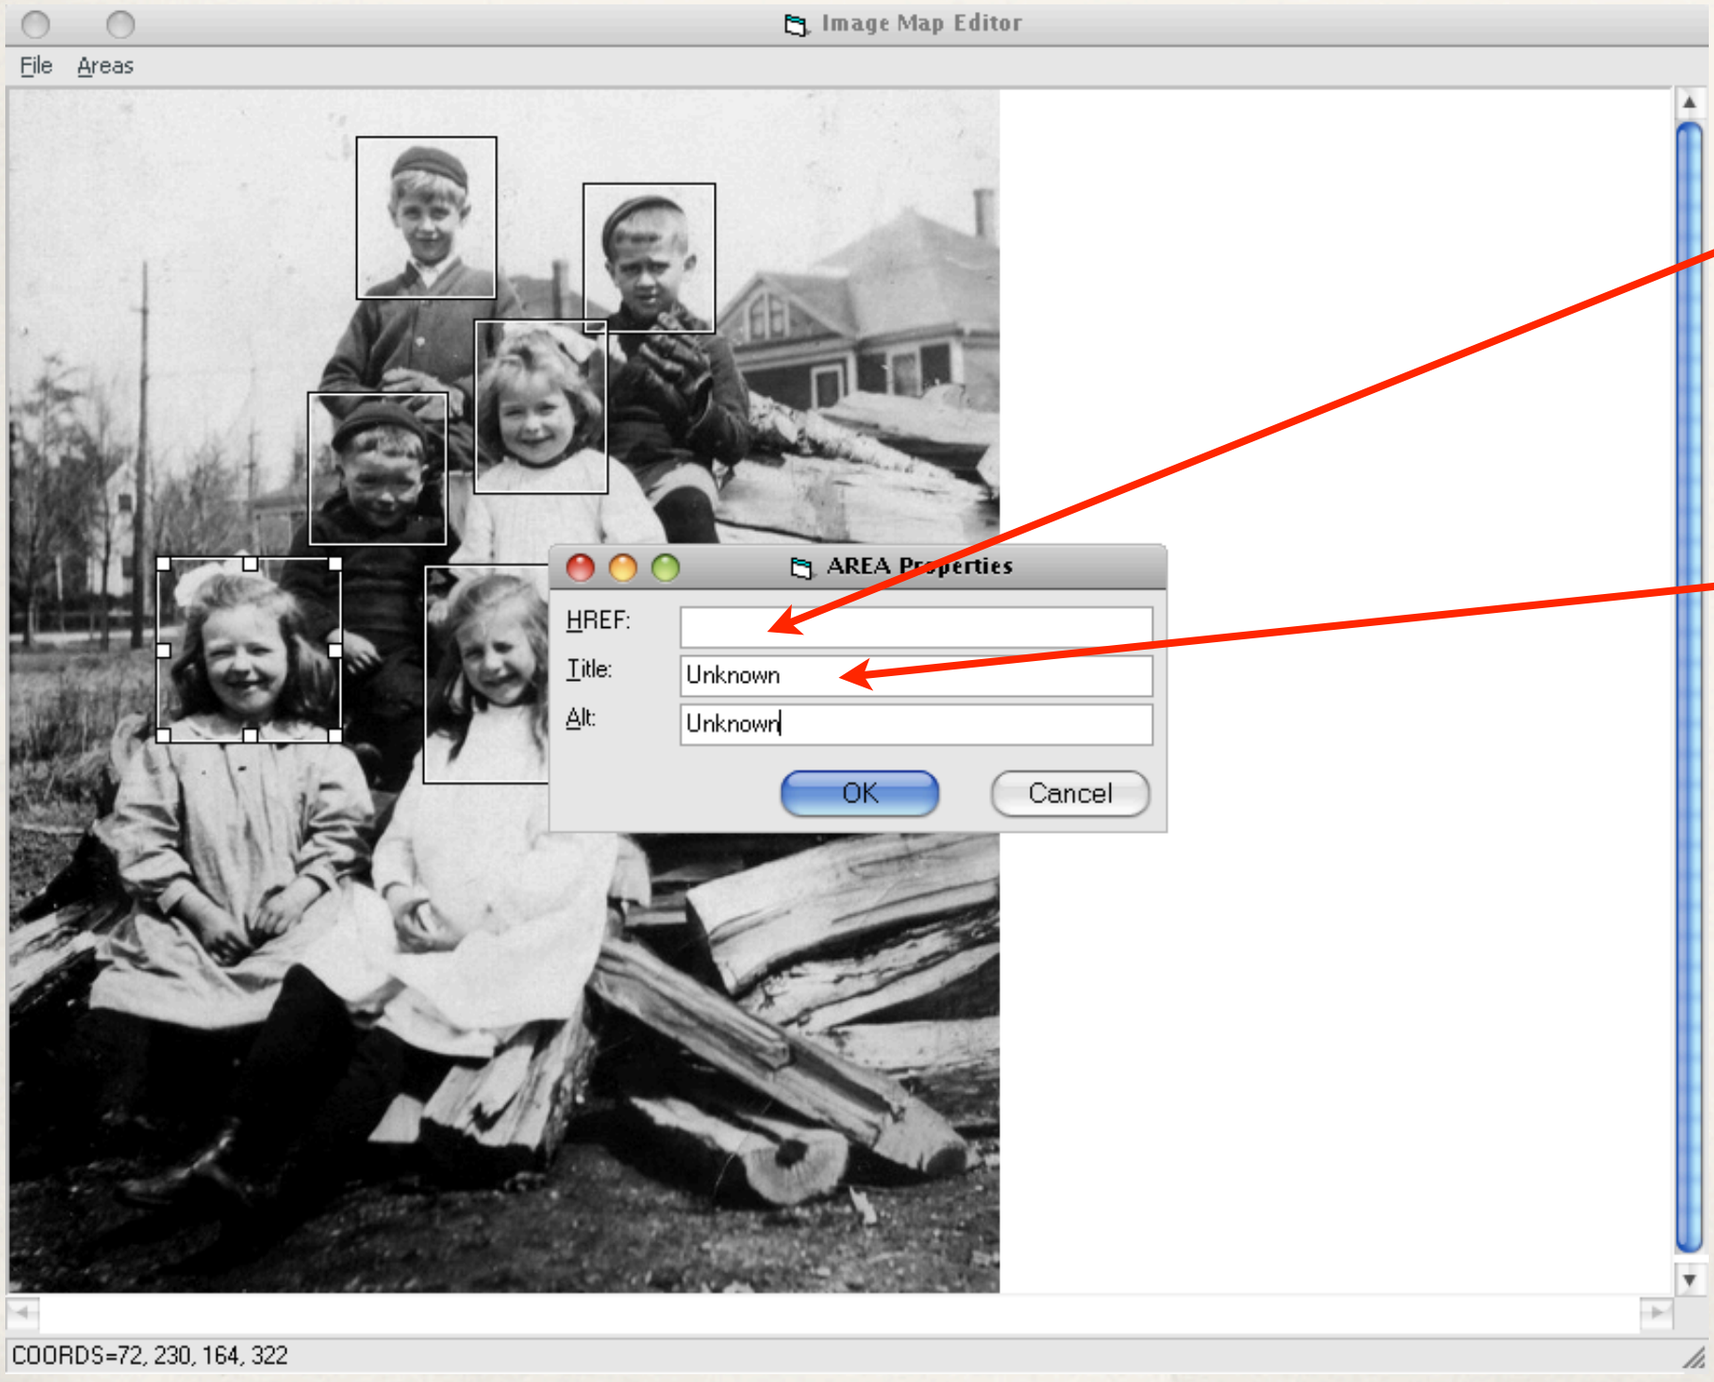
20. Click **OK**.

Step 2: TMG Utility



21. For unknown persons leave the **HREF** field blank.

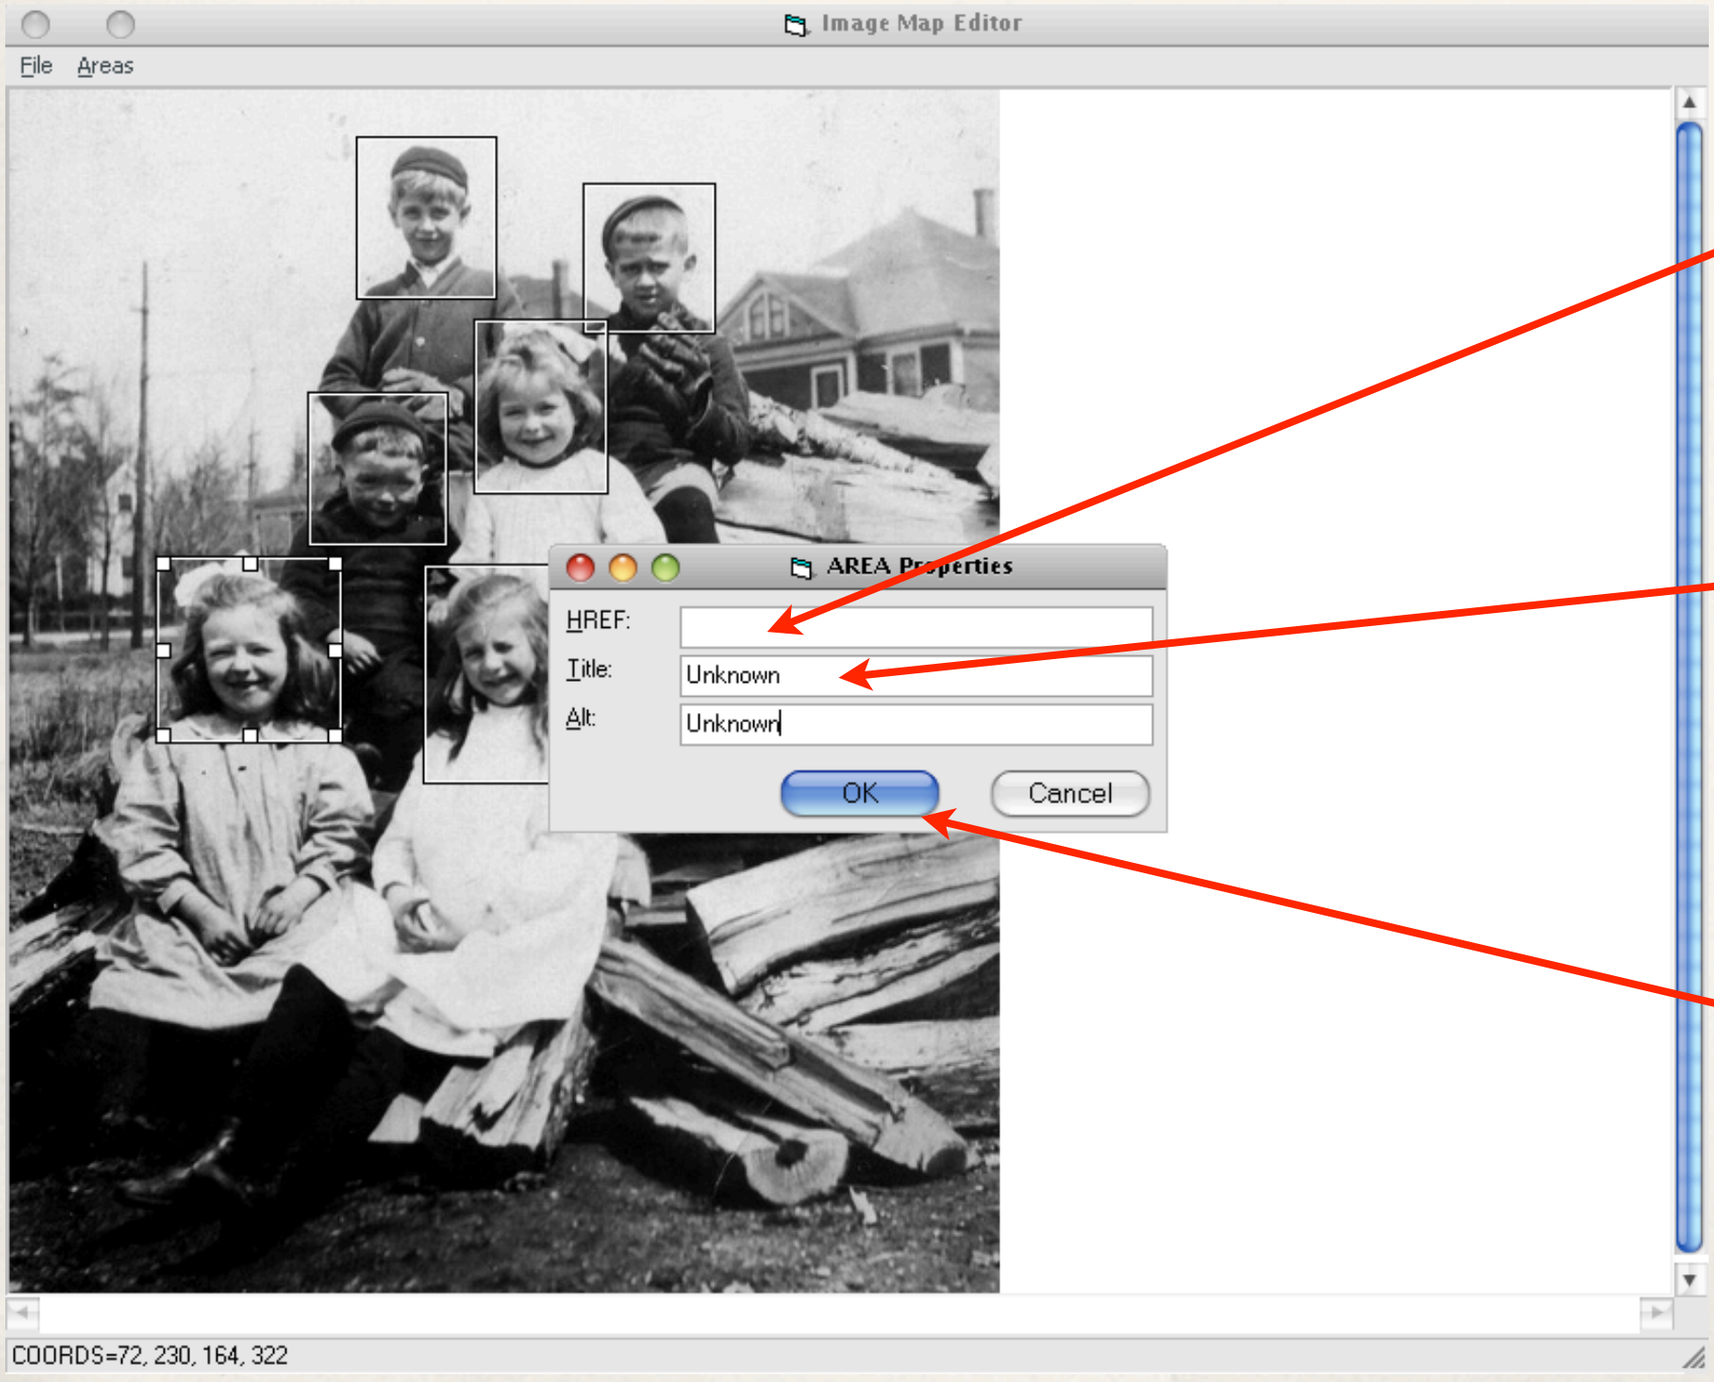
Step 2: TMG Utility



21. For unknown persons leave the **HREF** field blank.

22. Enter some appropriate text in the **Title** and **Alternate** fields.

Step 2: TMG Utility



21. For unknown persons leave the **HREF** field blank.

22. Enter some appropriate text in the **Title** and **Alternate** fields.

23. Click **OK**.

Step 2: TMG Utility

24. Click **File**, then **Save Image Map & Close**.

Step 2: TMG Utility

Person Page - 746

Frieda Ruth Palmer[1]

F, b. 25 March 1906, d. 12 February 1995

This is the Person Page for one of the people portrayed in the woodpile photo, Frieda Palmer as a young girl.

Step 5: Browse Site

Scrolling down the page we find the Group Photo tag

Name-Com Frieda Ruth **Palmer** is commonly known as Frieda.[2]

Birth* She was born on 25 March 1906 in **Moncton, Westmorland County, New Brunswick, Canada**.[3]

She was the daughter of George Norman **Palmer** and Harriett Jane **Brown**.[1]

Group Photo* She is included in a group photograph, circa 1913 in **Moncton, Westmorland County, New Brunswick, Canada**. If you are viewing this photo in a web publication, you may click on any face to view that person's page.[4]

Frieda and Albert Palmer on a wood pile in Moncton, ca. 1913. Click on any face to view that person's page.

Marriage* Frieda Ruth Palmer married George Leslie **Walker**, son of Arthur Preston **Walker** and Ella Mae **Townshend**, on 30 September 1933 in **Central United Church, Moncton, Westmorland County, New Brunswick, Canada, 46.089611,-64.778564**; they were married by license, #20346, by Rev. Robert Smart. George was 21 years old, a municipal accountant for the town of Chatham, New Brunswick, living in Chatham. Frieda was 27 years old, a stenographer for Sun Life Insurance Co., living with her parents at 266 Weldon St.,

Formal Studio Portrait

Catherine Minnie Walker[1]
F, b. 16 March 1876, d. 25 November 1958

Catherine "Minnie" Walker (1876-1958)

Father	David **Walker**[2] b. 10 Jun 1833, d. 31 Jan 1909
Mother	Elizabeth **Higgins** b. 14 Mar 1846, d. 18 Nov 1934
Charts	**Descendants of David Walker & Margaret Hetherington**

This is one example of being able to click on each face in the family portrait to instantly view their person page.

Tombstone Inscriptions

- A side note on recording tombstones.
- My practice, in order, is to photograph the entire marker, then a closeup of the inscription on the front.
- If they exist, I then photograph closeups of the inscriptions on the left, right and back faces, in that order.
- If they exist, I then photograph foot stones.
- If they exist, I then photograph family member flat stones
- I digress - documenting cemeteries is an entire other topic

Tombstone Inscriptions

As in the case of mapping snapshots or formal portraits, one can map tombstone inscriptions.
